Mc Graw Hill GO

Success Story

University of West Florida

My favorite thing about McGraw Hill GO is...

"The simplicity it provides for my students. We, as faculty, sometimes forget that students have a great deal of different technologies they have to learn for different classes. Using McGraw Hill GO helps make their lives easier since it lives within the LMS."

McGraw Hill GO helped me improve my course by...

"Allowing me to focus on high impact practices rather than on the technology of teaching."

My top 3 tips for using McGraw Hill GO:

1. Assign points for the reading and associated quizzes. It's important to show the value of reading!
2. Consider carefully how many attempts at quizzes you allow. We want to make sure students take those seriously.
3. Talk to your McGraw Hill rep! They are always helpful and patient.

What using McGraw Hill GO could mean for you:

"GO allowed me to focus on additional activities that are beneficial for my students to learn rather than focusing on managing technology."

> **Relax and focus on the other areas of teaching that are important to you. McGraw Hill GO is simple to use and if you ever have any concerns, they will be addressed and resolved quickly by McGraw Hill's excellent customer service."**
