

A Concise and Conceptual View of Environmental Science for Honors Courses

Environmental Science: A Study of Interrelationships is the perfect choice for an Honors/Electives course with a full-color, student-friendly layout, an introductory level approach that doesn't overwhelm students with too much detail, and a concise and conceptual writing style that is both interesting and accessible. More than 160 new photos and 85 new or revised illustrations, graphs and charts present detailed information to help students visualize concepts and connect them to current, real-world scenarios.

Students are taken on a scientific journey of our Earth and the relationship between humans and the natural world through Enger's interdisciplinary approach that is presented through multiple perspectives—historical, economic, political, social, and cultural. Students are lead to understand how local events can have world-wide implications to provide them with the conceptual framework they need to understand complex issues and ultimately formulate their own views about the issues that affect the world in which we live.

Personalized, Adaptive, and Dynamic Digital Resources

Environmental Science: A Study of Interrelationships includes access to robust digital resources for teachers and students, including:

- Comprehensive, editable test banks for each chapter
- Google Earth Activities, Labs, and additional inquiry activities to give students context for the global places and topics discussed in the text
- Online Teacher Manual including lecture suggestions and guidelines, pacing, and ELL and study strategies
- Customizable PowerPoint presentations
- An eBook and a *SmartBook*® adaptive reading experience, designed to help students learn faster, study more efficiently, and retain more knowledge

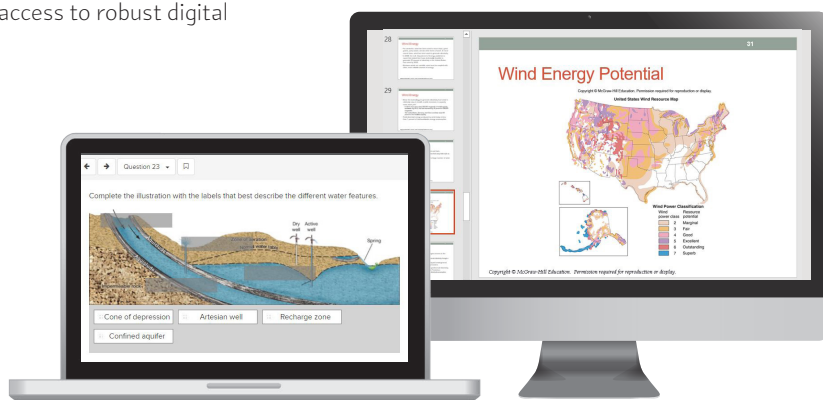

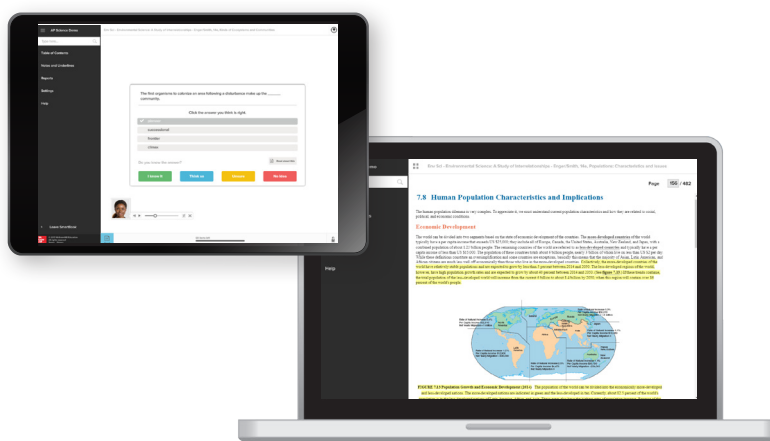

Table of Contents

CHAPTER 1	Environmental Interrelationships	CHAPTER 11	Biodiversity Issues
CHAPTER 2	Environmental Ethics	CHAPTER 12	Land-Use Planning
CHAPTER 3	Risk, Economics, and Environmental Concerns	CHAPTER 13	Soil and Its Uses
CHAPTER 4	Interrelated Scientific Principles: Matter, Energy, and Environment	CHAPTER 14	Agricultural Methods and Pest Management
CHAPTER 5	Interactions: Environments and Organisms	CHAPTER 15	Water Management
CHAPTER 6	Kinds of Ecosystems and Communities	CHAPTER 16	Air Quality Issues
CHAPTER 7	Populations: Characteristics and Issues	CHAPTER 17	Climate Change: A Twenty-First Century Issue
CHAPTER 8	Energy and Civilization: Patterns of Consumption	CHAPTER 18	Solid Waste Management and Disposal
CHAPTER 9	Nonrenewable Energy Sources	CHAPTER 19	Environmental Regulations: Hazardous Substances and Wastes
CHAPTER 10	Renewable Energy Sources	CHAPTER 20	Environmental Policy and Decision Making

High-Impact Study Sessions Focused on Individual Needs

SmartBook, powered by *LearnSmart*, is an online interactive, adaptive study tool that assesses a student's proficiency and knowledge, tracks which topics have been mastered, identifies areas that need more study, and presents focused content specific to the student's individual needs.

ISBN List

Student Bundle (Student Edition with Online Student Edition)	6 year: 978-0-07-903382-6		1 year: 978-0-07-903385-7
Online Student Edition Subscription	6 year: 978-0-07-903363-5		1 year: 978-0-07-903362-8
Online Teacher Edition Subscription	6 year: 978-0-07-903365-9		1 year: 978-0-07-903354-3

Access to the Online Student Edition includes access to a *SmartBook* adaptive ebook and additional teaching and learning resources.
