#### The Science of Psychology: An Appreciative View (King), 4e, AP Edition

SCIENTIFIC INQUIRY DOMAIN  Standard Area: Perspectives in Psychological Science	
Standard Area: Perspectives in Psychological Science	
	Chapter 1
1. Development of Psychology as an Empirical Science	4 - 14
1.1 Psychology as a discipline/goals as a science	4 - 8
1.2 Emergence of psychology as scientific discipline	8 - 10
1.3 Perspectives to understand behavior/mental processes	11 - 14
1.4 Evolution of psychology as scientific discipline	5 - 8
2. Major Subfields within Psychology	14 - 21
2.1 Value of basic and applied psychological research with human and non-human animals	14
2.2 Major subfields of psychology	14 - 19
2.3 Important role of psychology in benefiting society and improving people's lives	20 - 21
Standard Area: Research Methods, Measurement and Statistics	Chapter 2, 8
Research methods and measurements to study behavior/mental processes	26 - 47
1.1 Scientific method and its role in psychology	26 - 30
1.2 Quantitative and qualitative research methods	30 - 47
1.3 Systematic procedures to improve validity of research findings	41 - 46
1.4 Use of non-human animals in psychological research (how and why)	54
2. Ethical Issues in Research with Human/Non-human Animals	51 - 54
2.1 Ethical standards with human participants	51 - 54
2.2 Ethical guidelines with non-human animals	54
3. Basic Concepts of Data Analysis	32 - 34, 47 - 51
3.1 Descriptive statistics	47 - 50
3.2 Forms and use of qualitative data	47
3.3 Correlation coefficients and their interpretation	33 - 34
3.4 graphical representations of data in quantitative and qualitative methods	34
3.5 Other statistical concepts such as statistical significance and effect size	49 - 51
3.6 Validity and reliability in data analysis	264
BIOPSYCHOLOGICAL DOMAIN	
Standard Area: Biological Bases of Behavior	Chapter 3

1.	Structure and function of the nervous system in	62 - 64
nu	man and non-human animals	
	1.1 Major divisions/subdivisions of the human nervous system	64 - 65
	1.2 The neuron and process of neural transmission	65 - 74
	1.3 Central nervous system: structures and functions	74 - 86
	1.4 Lateralization of brain functions	86 - 88
	1.5 Mechanisms and importance of plasticity of the	
	nervous system	90 - 92
2.	Structure and function of the endocrine system	89 - 90
2.	2.1 How endocrine glands are linked to the nervous	
	system	89 - 90
	2.2 Effects of hormones on behavior and mental	
	processes	89 - 90
	2.3 Effects of hormones on the immune system	89 - 90
3.	Interaction between biological factors and experience	92 - 98
J.	3.1 Genetic transmission	92 - 97
	3.2 Interactive effects of heredity and environment	96 - 97
	3.3 Influence of evolved tendencies on behavior	97 - 98
1		75 - 78
4.	Methods and issues related to biological advances	
	4.1 Tools for studying the nervous system	75 - 78
	4.2 Advances in neuroscience	75 - 78
		02 07
		92 - 97
	4.3 Issues related to scientific advances in	
	neuroscience and genetics	
~ · •	neuroscience and genetics	
	ard Area: Sensation and Perception	Chapter 4
Standa 1.	ard Area: Sensation and Perception  The processes of sensation and perception	<b>Chapter 4</b> 101 - 105
	The processes of sensation and perception  1.1 Processes of sensation and perception and how	101 - 105
	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact	101 - 105 101 - 105
	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption	101 - 105 101 - 105 106 - 113
	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes	101 - 105 101 - 105
1.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption	101 - 105 101 - 105 106 - 113 106 - 113
1.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors	101 - 105 101 - 105 106 - 113 106 - 113 106 - 113
1.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and	101 - 105 101 - 105 106 - 113 106 - 113
1.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system	101 - 105 101 - 105 106 - 113 106 - 113 106 - 113
1.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system	101 - 105 101 - 105 106 - 113 106 - 113 106 - 113 113 - 124 124 - 130
1.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system	101 - 105 101 - 105 106 - 113 106 - 113 106 - 113
1.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis ( skin, kinesthesis and vestibular)	101 - 105 101 - 105 106 - 113 106 - 113 106 - 113 113 - 124 124 - 130 130 - 136
2.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis ( skin, kinesthesis and vestibular)	101 - 105 101 - 105 106 - 113 106 - 113 106 - 113 113 - 124 124 - 130
2.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis ( skin, kinesthesis and vestibular)  Interaction of person and environment in determining	101 - 105 101 - 105 106 - 113 106 - 113 106 - 113 113 - 124 124 - 130 130 - 136
2.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis ( skin, kinesthesis and vestibular)  Interaction of person and environment in determining reception	101 - 105 101 - 105 106 - 113 106 - 113 106 - 113 113 - 124 124 - 130 130 - 136 102 - 103
2.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis (skin, kinesthesis and vestibular)  Interaction of person and environment in determining reception  3.1 Gestalt principles of perception	101 - 105 101 - 105 106 - 113 106 - 113 113 - 124 124 - 130 130 - 136 102 - 103
2.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis ( skin, kinesthesis and vestibular)  Interaction of person and environment in determining reception  3.1 Gestalt principles of perception  3.2 Binocular and monocular depth cues  3.3 Importance of perceptual constancies	101 - 105 101 - 105 106 - 113 106 - 113 113 - 124 124 - 130 130 - 136 102 - 103 121 122 - 123
2.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis ( skin, kinesthesis and vestibular)  Interaction of person and environment in determining reception  3.1 Gestalt principles of perception  3.2 Binocular and monocular depth cues  3.3 Importance of perceptual constancies	101 - 105 101 - 105 106 - 113 106 - 113 106 - 113 113 - 124 124 - 130 130 - 136 102 - 103 121 122 - 123 124
2.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis ( skin, kinesthesis and vestibular)  Interaction of person and environment in determining reception  3.1 Gestalt principles of perception  3.2 Binocular and monocular depth cues  3.3 Importance of perceptual constancies  3.4 Perceptual illusions  3.5 The nature of attention	101 - 105 101 - 105 106 - 113 106 - 113 113 - 124 124 - 130 130 - 136 102 - 103 121 122 - 123 124 126 111 - 112
2.	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis (skin, kinesthesis and vestibular)  Interaction of person and environment in determining reception  3.1 Gestalt principles of perception  3.2 Binocular and monocular depth cues  3.3 Importance of perceptual constancies  3.4 Perceptual illusions  3.5 The nature of attention	101 - 105 101 - 105 106 - 113 106 - 113 113 - 124 124 - 130 130 - 136 102 - 103 121 122 - 123 124 126
3. per	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis ( skin, kinesthesis and vestibular)  Interaction of person and environment in determining reception  3.1 Gestalt principles of perception  3.2 Binocular and monocular depth cues  3.3 Importance of perceptual constancies  3.4 Perceptual illusions  3.5 The nature of attention  3.6 Influence of experiences and expectations on perception	101 - 105 101 - 105 106 - 113 106 - 113 113 - 124 124 - 130 130 - 136 102 - 103 121 122 - 123 124 126 111 - 112 112 - 113
3. per	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis ( skin, kinesthesis and vestibular)  Interaction of person and environment in determining reception  3.1 Gestalt principles of perception  3.2 Binocular and monocular depth cues  3.3 Importance of perceptual constancies  3.4 Perceptual illusions  3.5 The nature of attention  3.6 Influence of experiences and expectations on perception  ard Area: Consciousness	101 - 105  101 - 105  106 - 113  106 - 113  106 - 113  113 - 124  124 - 130  130 - 136  102 - 103  121  122 - 123  124  126  111 - 112  112 - 113  Chapter 5
3. per Stando	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis (skin, kinesthesis and vestibular)  Interaction of person and environment in determining reception  3.1 Gestalt principles of perception  3.2 Binocular and monocular depth cues  3.3 Importance of perceptual constancies  3.4 Perceptual illusions  3.5 The nature of attention  3.6 Influence of experiences and expectations on perception  ard Area: Consciousness  The relationship between conscious and unconscious	101 - 105 101 - 105 106 - 113 106 - 113 113 - 124 124 - 130 130 - 136 102 - 103 121 122 - 123 124 126 111 - 112 112 - 113
3. per Stando	The processes of sensation and perception  1.1 Processes of sensation and perception and how they interact  1.2 Threshold and adaption  Capabilities and limitations of sensory processes  2.1 Forms of physical energy for which humans and non-human animals do/do not have sensory receptors  2.2 The visual sensory system  2.3 The auditory sensory system  2.4 Other sensory systems such as olfaction, gustation, somesthesis ( skin, kinesthesis and vestibular)  Interaction of person and environment in determining reception  3.1 Gestalt principles of perception  3.2 Binocular and monocular depth cues  3.3 Importance of perceptual constancies  3.4 Perceptual illusions  3.5 The nature of attention  3.6 Influence of experiences and expectations on perception  ard Area: Consciousness	101 - 105  101 - 105  106 - 113  106 - 113  106 - 113  113 - 124  124 - 130  130 - 136  102 - 103  121  122 - 123  124  126  111 - 112  112 - 113  Chapter 5

1.2 Conscious (explicit) and unconscious (implicit processing	144 - 148
2. Sleep—and theories on why we sleep and dream	148 - 150
2.1 Circadian rhythm and its relation to sleep	148 - 150
2.2 The sleep cycle	148 - 155
2.3 Theories about the functions of sleep	154 - 156
2.4 Types of sleep disorders	156 - 158
2.5 Theories about the functions of dreams	158 - 160
3. Categories of psychoactive drugs and their effects	160 - 170
3.1 Major categories of psychoactive drugs and their effects	162 - 170
3.2 Actions of psychoactive drugs at the synaptic level	162 - 170
3.3 Biological and psychological effects of psychoactive drugs	162 - 170
3.4 Influence of culture and expectations on the use and experience of drugs	162 - 170
4. Other states of consciousness	169 - 176
4.1 Meditation, relaxation, and their effects	173 - 176
4.2 Hypnosis and controversies over its nature and use	169 - 173
4.3 Flow states	173

## DEVELOPMENT AND LEARNING DOMAIN

Standard Area: Life Span Development	Chapter 8, 9
1. Methods and issues in life span development	288 - 289
1.1 Interaction of environmental and biological	
factors in development, including the brain's role in all	289 - 290
aspects of development	
1.2 Issues of continuity/discontinuity and	290 - 291
stability/change	270 - 271
1.3 Methods for studying development	288 - 291
1.4 Sensitive and critical periods in development	291
1.5 End of life issues	314 - 320
2. Theories of life span development	298 - 310
2.1 Theories of cognitive development	298 - 304
2.2 Theories of moral development	309 - 311
2.3 Theories of social development	304 - 309
3. Prenatal development and the newborn	291 - 297
3.1 Physical development from conception through birth, and influences on prenatal development	291 - 297
3.2 Newborn reflexes, temperament, and abilities	293 - 294
4. Infancy (the first 2 years)	293 - 309
4.1 Physical and motor development	293 - 297
4.2 Development of infant perceptual abilities and	200 204
intelligence	298 - 304
4.3 Development of attachment and role of the	304 - 309
caregiver	304 - 309
4.4 Development of communication and language	274 - 281

5.1 Physical and motor development         296 - 297           5.2 Development of memory and thinking ability         298 - 304           5.3 Social, cultural, and emotional development         304 - 309           6. Adolescence         311 - 314           6.1 Major physical changes         311 - 312           6.2 Development of reasoning and morality         312           6.3 Identity formation         312 - 314           6.4 Role of family and peers in adolescent development         312 - 314           7.4 Adulthood and aging         314 - 320           7.1 Major physical changes         315 - 317           7.2 Cognitive changes         317 - 318           7.3 Social, cultural and emotional issues in aging         318 - 320           Standard Area: Learning         Chapter 6           1. Classical conditioning         181 - 190           1.1 Principles of classical conditioning         181 - 185           1.2 Clinical and experimental examples of classical conditioning         185 - 190           2. Operant conditioning in everyday life         185 - 190           2. Operant conditioning in everyday life         195 - 200           2.1 The Law of Effect         191           2.2 Principles of operant conditioning in everyday life         199 - 200           3. Observational and cognitive learning <th></th> <th></th> <th>200 201</th>			200 201
5.2 Development of memory and thinking ability 5.3 Social, cultural, and emotional development 6.4 Adolescence 6.1 Major physical changes 6.2 Development of reasoning and morality 6.3 Identity formation 6.4 Role of family and peers in adolescent development 6.5 Adulthood and aging 7.1 Major physical changes 7.1 Major physical changes 7.1 Major physical changes 7.2 Cognitive changes 7.3 Social, cultural and emotional issues in aging 7.3 Social, cultural and emotional issues in aging 8 Standard Area: Learning 1. Classical conditioning 1.1 Principles of classical conditioning 1.2 Clinical and experimental examples of classical conditioning 1.3 Classical conditioning 1.4 Classical conditioning 1.5 Cloperant conditioning 1.6 Classical conditioning 1.7 The Law of Effect 1. Classical conditioning 1.8 Social cultural and experimental examples of operant conditioning 1.9 Coperant conditioning 1.1 The Law of Effect 1.2 Principles of operant conditioning 1.3 Cloperant conditioning 1.4 Operant conditioning 1.5 Cloperant conditioning 1.6 Cloperant conditioning 1.7 The Law of Effect 1.8 Cloperant conditioning 1.9 Cloperant conditioning 1.1 The structural examples of operant conditioning 1.1 Principles of observational and cognitive learning 1.2 Cloperant conditioning in everyday life 1.5 Cloperant conditioning 190 - 200 1.6 Cloperant conditioning 190 - 200 1.7 The Law of Effect 1.9 Cloperant conditioning 190 - 200 1.1 The Law of Effect 1.1 The structural examples of operant 190 - 200 1.1 The conditioning 190 - 200 1.1 The structural features of language 200 - 206 1.1 The relationship between language and thought 275 - 277 1.1 The ories and development stages of language 274 - 281 1.2 The relationship between language and thought 275 - 277 1.3 Theories and development and other cognitive processes 1.4 Theories of language acquisition 190 - 280 - 281 1.5 Theories of language acquisition 190 - 280 - 281			299 - 304
6. Adolescence 311 - 314 6.1 Major physical changes 311 - 312 6.2 Development of reasoning and morality 312 6.3 Identity formation 312 - 314 6.4 Role of family and peers in adolescent development 312 - 314 6.5 Adulthood and aging 314 - 320 7.1 Major physical changes 315 - 317 7.2 Cognitive changes 315 - 317 7.3 Social, cultural and emotional issues in aging 318 - 320  Standard Area: Learning Chapter 6 1. Classical conditioning 181 - 190 1.1 Principles of classical conditioning 181 - 190 1.2 Clinical and experimental examples of classical conditioning 182 - 190 2.0 Operant conditioning 190 - 200 2.1 The Law of Effect 191 2.2 Principles of operant conditioning 191 - 199 2.3 Clinical and experimental examples of operant conditioning 190 - 200 2.4 Operant conditioning 199 - 200 3.0 Observational and cognitive learning 200 - 206 3.1 Principles of observational and cognitive learning 200 - 206 3.1 Principles of observational and cognitive learning 202 - 204 3.2 Observational and cognitive learning 202 - 204 3.2 Observational and cognitive learning 274 - 281 1.1 The structural features of language 274 - 281 1.1 The structural and function of language 274 - 281 2.2 Effects of second language acquisition 280 - 281 2.3 Theories of language acquisition 280 - 281 2.3 Theories of language acquisition 280 - 281 2.3 Theories of language acquisition 280 - 281			
6. Adolescence 6.1 Major physical changes 6.2 Development of reasoning and morality 6.3 Identity formation 6.4 Role of family and peers in adolescent development 7. Adulthood and aging 7.1 Major physical changes 7.2 Cognitive changes 7.3 Social, cultural and emotional issues in aging 818 - 320  Standard Area: Learning 1. Classical conditioning 1. Principles of classical conditioning 1. 2 Clinical and experimental examples of classical conditioning 1. 3 Classical experimental examples of classical conditioning 1. 3 Classical orditioning 1. 4 Cloperant conditioning 1. 5 Cloperant conditioning 1. 6 Clause of Effect 1. 190 - 200 2. 1 The Law of Effect 1. 191 2. 2 Principles of operant conditioning 2. 3 Clinical and experimental examples of operant conditioning 2. 4 Operant conditioning in everyday life 3. Observational and cognitive learning 3. Observational and cognitive learning 3. Observational and cognitive learning in everyday life  Standard Area: Language Development 1. Structural features of language 274 - 281 1. The structural features of language 274 - 281 1. The structural features of language 274 - 279 2. 1.2 Shallow(surface) and deep (elaborate) processing	216 - 217	
1.3 Strategies for improving encoding of memory	218	
2. Storage of memory	219 - 228	
2.1 Working memory and long term memory	221 - 227	
2.2 Biological processes related to how memory is	227 - 230	
stored	221 - 230	
2.3 Types of memory and memory disorders (e.g.,	242	

i dti-o\	
amnesias, dementias)	221
2.4 Strategies for improving storage of memories	221
3. Retrieval of memory	230 - 239
3.1 Retrieval cues in memory	232 - 239
3.2 Role of interference in retrieval	240 - 241
3.3 Factors that influence memory retrieval	242 - 244
3.4 Malleability of memories	239 - 241
3.5 Strategies for improving memory retrieval	242 - 244
Standard Area: Thinking	Chapter 8
Basic elements comprising thought	250 - 252
1.1 Cognitive processes in understanding information	250 - 252
1.2 Problem solving and decision making processes	253 - 263
1.3 Non-human problem solving abilities	253 - 263
2. Obstacles related to thought	253 - 255
2.1 Obstacles to problem solving	253 - 255
2.2 Obstacles to decision making	255 - 260
2.3 Obstacles to making good judgments	255 - 260
Standard Area: Intelligence	Chapter 8
1. Perspectives on intelligence	263, 272 -273
1.1 Intelligence as a general factor	263
1.2 Alternative conceptualizations of intelligence	272 -273
	269 - 272
1.3 Extremes of intelligence	
2. Assessment of intelligence	264 - 269
2.1 History of intelligence testing, including	264
use/misuse in context of fairness	264 260
2.2 Current methods of assessing human abilities	264 - 269
2.3 Reliability and validity (measures and data)	264
3. Issues in intelligence	266 - 267
3.1 Consequences of intelligence testing	266 - 267
	267 - 269
3.2 Influences of biological, cultural, and	
environmental factors on intelligence	
INDIVIDUAL VARIATION DOMAIN	
Standard Area: Motivation	Chapter 10, 11
1. Perspectives on motivation	325 - 328
1.1 Biologically based theories of motivation	326 - 327
1.2 Cognitively based theories of motivation	327 – 328, 336 - 337
1.3 Humanistic theories of motivation	334 - 336
1.4 The role of culture in human motivation	332 - 333
2. Domains of motivated behavior in humans and	
non-human animals	325 - 339
2.1 Eating behavior	328 - 334
2.2 Sexual behavior and orientation	374 - 379
2.3 Achievement motivation	335 - 338
2.4 Other ways in which humans and non-human	
animals are motivated	350 - 351
Standard Area: Emotion	Chapter 10
Similari a 11 ca. Elliottoli	Cimpici 10

L Parenactiviae on amotion	220 241
1. Perspectives on emotion	339, 341
1.1 Biological and cognitive components of emotion	340 - 344
1.2 Psychological research on basic human emotions	347 - 349
1.3 Theories of emotional experience	347 - 349
2. Emotional interpretation and expression	347 - 349
2.1 Biological influence on emotional interpretation	340 - 343
and expression	310 313
2.2 Influence of culture and gender on emotional	346 - 347
interpretation and expression	0.10
2.3 Influence of other environmental factors on	345 - 347
emotional interpretation and expression	
3. Domains of emotional behavior	350 - 351
3.1 Biological and environmental influences on the	350 - 351
expression and experience of negative emotions	330 331
3.2 Biological and environmental influences on the	350 - 351
expression and experience of positive emotions	
Standard Area: Personality	Chapter 12
1. Perspectives on personality	394 - 419
1.1 Psychodynamic theories	394 - 401
1.2 Trait theories	404 - 408
1.3 Humanistic theories	401 - 403
1.4 Social-cognitive theories	412 - 415
2. Assessment of personality	419 - 422
2.1 Personality assessment techniques	419 - 422
2.2 Reliability and validity of personality assessment	410 422
techniques	419 - 422
3. Issues in Personality	422 - 426
3.1 Biological and situational influences	415 - 419
	415 - 419 415 - 419
<ul><li>3.2 Stability and change</li><li>3.3 Connections to health and work</li></ul>	415 - 419 419 - 422
3.2 Stability and change	415 - 419 419 - 422 403
<ul> <li>3.2 Stability and change</li> <li>3.3 Connections to health and work</li> <li>3.4 Self-concept</li> <li>3.5 Individualistic and collectivistic cultural</li> </ul>	415 - 419 419 - 422
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality	415 - 419 419 - 422 403 409
<ul> <li>3.2 Stability and change</li> <li>3.3 Connections to health and work</li> <li>3.4 Self-concept</li> <li>3.5 Individualistic and collectivistic cultural</li> </ul>	415 - 419 419 - 422 403
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders	415 - 419 419 - 422 403 409 <b>Chapter 15</b>
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders  1. Perspectives on abnormal behavior	415 - 419 419 - 422 403 409 <b>Chapter 15</b> 499 - 500
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders  1. Perspectives on abnormal behavior 1.1 Psychologically abnormal behavior	415 - 419 419 - 422 403 409 <b>Chapter 15</b> 499 - 500 498 - 501
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders  1. Perspectives on abnormal behavior 1.1 Psychologically abnormal behavior 1.2 Historical and cross-cultural views of abnormality	415 - 419 419 - 422 403 409 <b>Chapter 15</b> 499 - 500 498 - 501 498 - 501
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders  1. Perspectives on abnormal behavior 1.1 Psychologically abnormal behavior 1.2 Historical and cross-cultural views of abnormality 1.3 Major models of abnormality	415 - 419 419 - 422 403 409 <b>Chapter 15</b> 499 - 500 498 - 501 498 - 501 500 - 501
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders  1. Perspectives on abnormal behavior 1.1 Psychologically abnormal behavior 1.2 Historical and cross-cultural views of abnormality 1.3 Major models of abnormality 1.4 Stigma and abnormal behavior	415 - 419 419 - 422 403 409 <b>Chapter 15</b> 499 - 500 498 - 501 498 - 501 500 - 501 526 - 528
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders  1. Perspectives on abnormal behavior 1.1 Psychologically abnormal behavior 1.2 Historical and cross-cultural views of abnormality 1.3 Major models of abnormality 1.4 Stigma and abnormal behavior 1.5 Impact of psychological disorders on the	415 - 419 419 - 422 403 409 <b>Chapter 15</b> 499 - 500 498 - 501 498 - 501 500 - 501
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders  1. Perspectives on abnormal behavior 1.1 Psychologically abnormal behavior 1.2 Historical and cross-cultural views of abnormality 1.3 Major models of abnormality 1.4 Stigma and abnormal behavior 1.5 Impact of psychological disorders on the individual, family and society.	415 - 419 419 - 422 403 409 <b>Chapter 15</b> 499 - 500 498 - 501 498 - 501 500 - 501 526 - 528 523 - 528
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders  1. Perspectives on abnormal behavior 1.1 Psychologically abnormal behavior 1.2 Historical and cross-cultural views of abnormality 1.3 Major models of abnormality 1.4 Stigma and abnormal behavior 1.5 Impact of psychological disorders on the individual, family and society. 2. Categories of psychological disorders	415 - 419 419 - 422 403 409 <b>Chapter 15</b> 499 - 500 498 - 501 498 - 501 500 - 501 526 - 528 523 - 528 502 - 523
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders  1. Perspectives on abnormal behavior 1.1 Psychologically abnormal behavior 1.2 Historical and cross-cultural views of abnormality 1.3 Major models of abnormality 1.4 Stigma and abnormal behavior 1.5 Impact of psychological disorders on the individual, family and society. 2. Categories of psychological disorders 2.1 Classification of psychological disorders	415 - 419 419 - 422 403 409 <b>Chapter 15</b> 499 - 500 498 - 501 498 - 501 500 - 501 526 - 528 523 - 528 502 - 523 500 - 501
3.2 Stability and change 3.3 Connections to health and work 3.4 Self-concept 3.5 Individualistic and collectivistic cultural perspectives and personality  Standard Area: Psychological Disorders  1. Perspectives on abnormal behavior 1.1 Psychologically abnormal behavior 1.2 Historical and cross-cultural views of abnormality 1.3 Major models of abnormality 1.4 Stigma and abnormal behavior 1.5 Impact of psychological disorders on the individual, family and society. 2. Categories of psychological disorders	415 - 419 419 - 422 403 409 <b>Chapter 15</b> 499 - 500 498 - 501 498 - 501 500 - 501 526 - 528 523 - 528 502 - 523

experience of psychological disorders	
APPLICATIONS OF	
PSYCHOLOGICAL SCIENCE	
DOMAIN	
Standard Area: Treatment of Psychological Disorders	Chapter 16
Perspectives on treatment	531 - 555
1.1 Change in psychological treatments over time	532 - 533
and among cultures	332 - 333
1.2 Psychological perspectives and methods of	534 - 555
treatment	
1.3 Reasons for psychologists' use of a variety of	534 - 536
treatment options	
2. Categories of treatment and types of treatment	537 -
providers  2.1 Biomedical treatments	544 - 550
2.1 Biomedical treatments  2.2 Psychological treatments	537 - 554
2.3 Age appropriate treatments	553 - 554
2.4 Efficacy of treatments for particular disorders	534 - 535
2.5 Factors that improve treatment efficacy	534 - 535
2.6 Treatment providers for psychological	
disorders and training required for each	533
3. Legal, ethical, and professional issues in the treatment	,
of psychological disorders	554 - 555
3.1 Ethical challenges in delivery of treatment	554 - 55
3.2 National and local resources for support of	552 - 553
individuals with psychological disorders	332 - 333
Standard area: Health	Chapter 17
1. Stress and coping	560 - 567
1.1 Stress as a psychophysiological reaction	568 - 570
1.2 Potential sources of stress	560
1.3 Physiological and psychological consequences for	572 - 573
health	372 373
1.4 Physiological, cognitive, and behavioral strategies	561 - 567
to deal with stress	5.05 5.07
2. Behaviors and attitudes that promote health	565 - 567
2.1 Ways to promote mental health and physical fitness	575 - 577
2.2 Characteristics of, and factors that promote,	
resilience and optimism	571 - 575
resinence and optimism	
2.3 Effective and ineffective means of dealing with	560 - 567
stressors and other health issues	
2.	
Standard area: Vocational Applications	Chapter 1, 16
1. Career options	14 - 20
1.1 Careers in psychological science and practice	14 - 20
1.2 Careers related to psychology	
2. Educational requirements	533

2.1 Degree requirements for psychologists and psychology-related careers	533
2.2 Resources to help select psychology programs for further study	533
3. Vocational applications of psychological science	14 - 20
3.1 Ways in which psychological science addresses domestic and global issues	14 - 20
3.2 Careers in psychological science that have evolved as a result of domestic and global issues	14 - 20
