

The Role of the Athletic Trainer in Sports Medicine An Introduction for the Secondary School Student

Closely aligned with the National Athletic Trainers' Association Recommended Course Outline for Secondary School Instructors

The Role of the Athletic Trainer in Sports Medicine, An Introduction for the Secondary School Student, available in hardcover, is a new program that introduces Athletic Training to the Secondary School student. The Online Student Edition provides additional resources to students where they can highlight text, take notes, and submit online assignments. The content matches new curriculum standards created by NATA specifically targeted to the Secondary School student to help them begin their Athletic Training tutelage. More information about these standards can be found at nata.org/sites/default/files/secondary-school-sports-medicine-course-outline.pdf

Program Highlights

- Correlations to NATA standards
- Hands-On Interactive Activities
- Mobile eBook
- Additional digital resources including instructor tools and enlarged diagrams
- Complete reference guide with source information in every Unit
