

SRA Building Vocabulary Skills

Grades K-6

Building Vocabulary Skills

Building Vocabulary Skills

Help students improve test scores and increase language arts proficiency

The Only Vocabulary Program of Its Kind

Building Vocabulary Skills is a supplementary program that enhances learning by presenting fundamental vocabulary skills and strategies in a unique lesson structure.

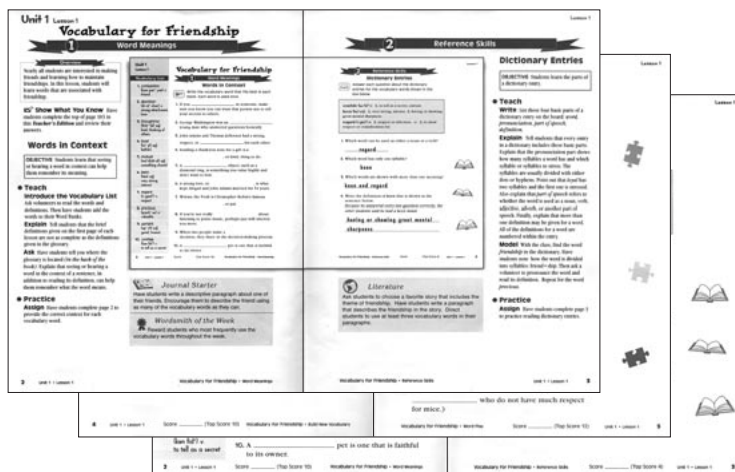

- Each lesson is based on a four-part approach to word learning: word meaning, reference skills, building new vocabulary, and word play.
- Each strategy and skill meets current vocabulary guidelines and research strategies.
- Two main word-learning goals help students secure an understanding of high-frequency words and broaden their acquisition of new vocabulary.
- Six review lessons provide exposure to and practice with standardized test formats.

Practical Vocabulary Practice for Students at Every Level

- Fun, interactive word-learning activities foster independent vocabulary learning.
- Themed, credible word lists are carefully selected so that students learn high-frequency words.
- More than 300 words are introduced at each grade level in a four-part approach so that no words are taught in isolation.
- Each lesson includes tips and strategies for teaching to English-language learners.
- Glossary and reference sections are included to provide students with definitions, roots, prefixes, suffixes and more.

Simple Components Make It Easy to Implement

- Student Editions (Grades K-6) offer:
 - 36 lessons organized into six units with a unique four-part structure
 - Grades K and 1 Editions designed to reinforce vocabulary knowledge at the earliest grade levels
- Teacher's Editions (Grades K-6) provide:
 - Brief, 10-15 minute lessons coordinating with each activity in the Student Edition
 - Extension activities for group or independent learning
 - English-language development
 - Assessment in the form of diagnostics, quizzes, oral assessments, and more
