

Standards-Aligned, Adaptive Math for Grades K-3

Grades 4 and 5 coming in 2026!

Everything between here on the footer is authorable and can be customized by region

Personalized, Playful Math Learning

ALEKS Adventure is a supplemental solution that sets each student on an individualized, AI-driven path in a vibrant virtual universe where they can explore and connect with their classmates—all while tackling the math concepts they are ready to learn at their own pace. Open the door to engaging, math-fueled fun.

ALEKS Adventure in the Classroom

See the program in action at Candochly Elementary School.

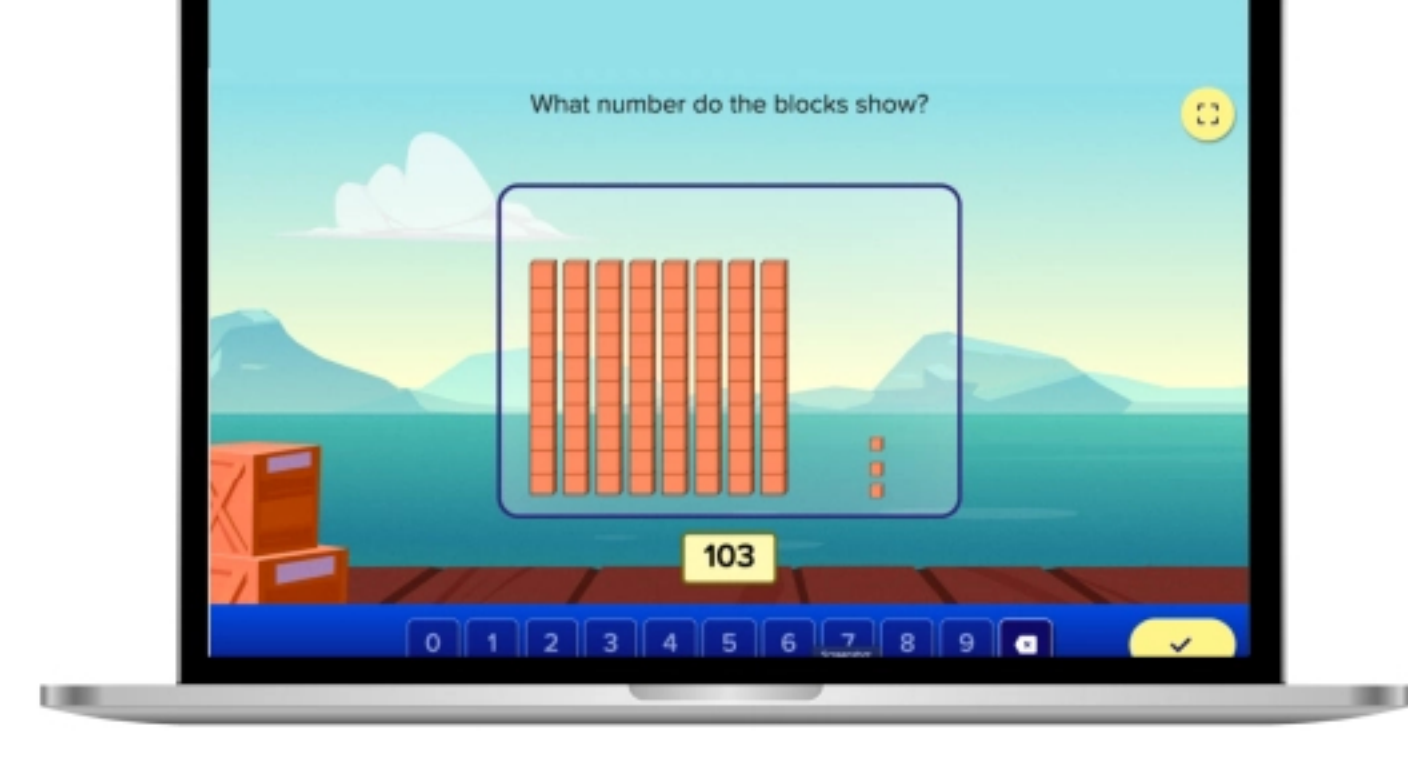

“ALEKS Adventure is great independent practice. It's like having an extra teacher. It's very visual and highly engaging.”

- First Grade Teacher

An Adaptive Learning Tool

Using dynamic AI technology, ALEKS Adventure determines what each student knows, doesn't know, and is ready to learn before generating lessons on those specific topics. If a student is struggling, the program adjusts their learning path as needed to provide additional practice and review.

A Time-Saving Teacher's Aide

ALEKS Adventure supports teachers with in-depth reporting and actionable data as well as flexible implementation options that enable students to work independently or in small groups—freeing educators to focus on other challenges.

A Learning Adventure

As students learn math concepts in ALEKS Adventure, they unlock access to exciting new worlds that challenge them to take on increasingly complex topics. Using a digital map, they can track their progress and chart where they have been and where they are going on their learning journey.
