

Students Perform Better and Save Time and Money with ALEKS Prep

Help students prepare and review topics before a term begins or in the first few weeks of class with ALEKS Prep products. The personalized path in ALEKS gives students a chance to refresh important concepts that they might have forgotten.

Indiana University Bloomington

Research from Indiana University Bloomington compares the results of 2561 students who took an on-campus Intro/Prep Chemistry Course with 607 students who used ALEKS Prep for Chemistry in order to qualify for General Chem over a three-year period. When comparing the final grades for each group of students:

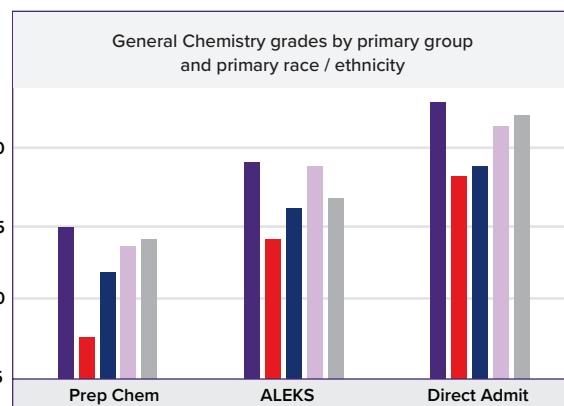

- ✓ ALEKS Prep was **equally effective** as an Intro/Prep course, saving students approximately \$1.5M.
- ✓ ALEKS students performed better, especially African-American students who achieved a 2.42 GPA vs. 1.87. While both groups had different GPAs and ACT/SAT scores, propensity score matching confirmed that ALEKS students performed slightly better.

| Cost and Time Comparison | | |
|--------------------------|--|----------|
| | On-Campus Prep Course | ALEKS |
| Time Per Student | 135-225 hours | 33 hours |
| Cost Per Student | \$1,068-\$1,780 In State \$3,545-\$5,904 Out of State | \$30* |
