

## GETTING STARTED WITH A PRE-BUILT OLC-ALIGNED COURSE

Video: [CLICK TO VIEW](#)

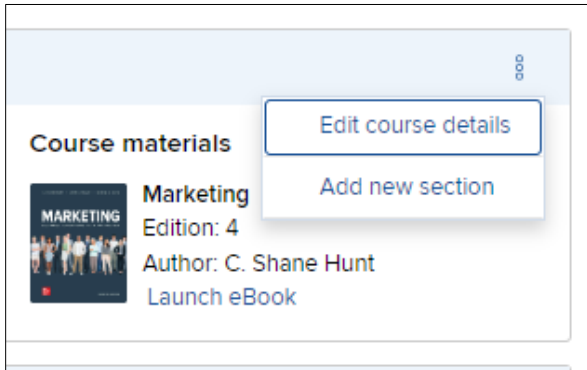

Go to <https://connect.mheducation.com>. Enter the email address and password used to set up your account. If unsure of your account information, try the 'Forgot password?' link or contact your Learning Technology Representative.

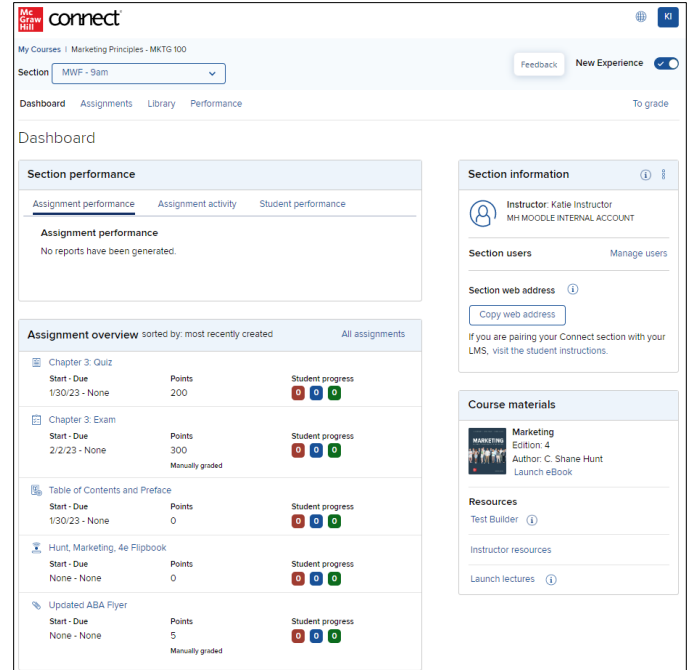

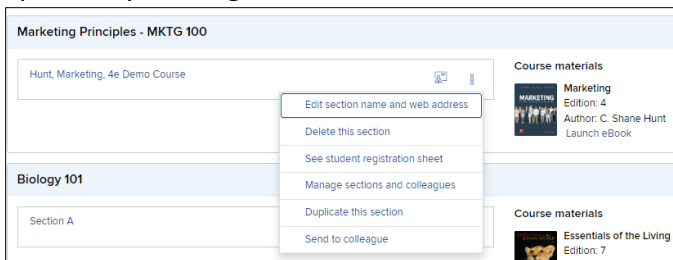

The first page is your course homepage. Any newly copied courses will be at the top of your page, and note **'NEW'** to the left of the course name.

If you want to rename the course, you can do that by clicking on the course options menu, as indicated by the three vertical boxes. Select edit course details, and make your changes.

Similarly, edit the section name and access other options by clicking the three dots in the section box.

Clicking the Connect course section name will take you to the section dashboard. The dashboard contains four course management widgets – Section Performance, Section Information, Assignment Overview, and Course Materials. McGraw Hill Support at Every Step has resources for each of the widgets if you are unfamiliar. The tabs in the upper right of the page are links to a dedicated course assignments page, a Library page for Instructor Resources, and a Performance tab for reports. Note that with a copied course, you will need to review the assignment dates to align with your syllabus.

You can also visit the tips and tutorials menu on the right-hand side of the Connect site to find more guides and videos about tools in your Connect course.
