

Tips for Updating Connect Assignments After an Evergreen Release or Update

Evergreen uses a release-centered approach that seamlessly brings new and updated content, tools, and accessibility improvements into Connect. Between Releases, which include changes to both the narrative and digital content of the course, digital updates introduce new learning activities, helping keep your course content current and relevant in today's rapidly changing environment.

Step 1: Look for Notifications in Your Connect Account

If your title has an upcoming Evergreen Release (includes eBook changes), you'll see notifications 90 days before the new release will be available, alerting you of the upcoming release on the My Courses and Manage Assignment pages, as well as within the Release Details.

You'll also see notifications on the My Courses and Manage Assignment pages when one or more of your titles has recently received new content as part of a digital update.

Step 2: Review the Release Notes

Release Notes provide a detailed summary of updates made to the narrative content or eBook, as well as information about any new or revised digital content, including new tools and activities available for your course.

You can find the release notes within Connect on your **My Courses** page by clicking the **Release Details** tab for the course that you want to review. From the Release Details tab, you can access the **Release Notes** for your course, and if your title is scheduled for an upcoming release, Release Preview gives you early access to explore what's coming. These features are also available in the top left corner of the **Manage Assignments** page for your course

Step 3: Review and Adjust Your Assignments in Connect

After you've accepted a new Evergreen Release, or your course has received new content as part of an Evergreen update, you'll want to review and adjust your assignments.

After a new Evergreen Release (includes eBook changes) is available, you'll have the option to update to the latest release when duplicating one of your existing courses. Once you've accepted the latest release, you'll see notifications on your Manage Assignments page, indicating if your Question Bank assignments received updated content, or if content needed to be deleted. Content may be deleted due to accessibility, currency, or licensing issues, or if a question was moved to another location and is duplicative.

Click on the assignment title to learn more about question updates and deletions within your assignments.

Step 4: Assign the latest question bank content

Filters and badges in the Question Bank make it easy for you to find and assign new and updated questions for your students. Look for the “Release” filters to see new and updated content delivered as part of an Evergreen Release (includes eBook changes), or the “Release Update” filter to see new activities delivered as part of an Evergreen update.

The screenshot shows the 'Content Selection' interface for an assignment titled 'Evidence of Evolution'. The interface displays a list of 14 questions with various filters and badges. A red box highlights the 'Release' filter, which is expanded to show 'Select All' and 'New 2025' options. Another red box highlights the 'Release Update' filter, which is expanded to show 'Select All' and 'New' options. The 'Apply' button is visible at the bottom right of the filter panel.
