

Saladin, Anatomy & Physiology: The Unity of Form and Function, 10, 1265328625

Our Commitment to Accessibility

Creating accessible products is a priority for McGraw-Hill Education. We have put in place processes to make accessibility and meeting the WCAG AA guidelines part of our day-to-day development efforts and product roadmaps. We measure and track our progress to ensure we continually make improvements to address the evolving industry standards and to meet our learners' accessibility needs. VPATS are available upon request. Our audits and VPATS are completed by a third party.

Testing Process

We are committed to testing with users with different ranges of abilities and disabilities to ensure the usability and accessibility of our products.

A series of tests are conducted to ensure our compliance with the WCAG AA guidelines. Baseline assessments are completed, using a third-party vendor, to uncover gaps and inform a remediation roadmap. As new features are developed an accessibility-specific success criterion is defined, and all new work is tested to ensure it complies with the criteria prior to release. As these products continue to grow and the accessible feature set expands, semi-regular assessments will be completed by an external vendor to ensure continued compliance with the WCAG guidelines.

Connect Platform

This report reflects the accessibility level of the content available within our Connect platform as it relates to specific title.

Content

Alternative Text Files: We provide electronic files of the main text content for use by students with disabilities. In order to send a file, we require a written request from the disability services center of your school. Requests can be submitted via Access Text Network at www.accesstext.org or submitted directly to McGraw-Hill Education. To submit to McGraw-Hill, please email us at mhe-permissions@mheducation.com or fax the request to 646-766-2019.

Many of our titles have alt descriptions of images available in a separate document provided to the DSS office. To request this file, please contact us at accessibility@mheducation.com.

McGraw-Hill Education is actively working on developing more accessible assessment experiences. While some of our interactive assessment questions are not yet accessible to users of assistive technology, we continue to make improvements with each platform release.

Content Feature	Status & Alternatives
eBook is operable without a mouse (keyboard navigable) and can be accessed using alternative output devices.	The McGraw Hill eBook was built with accessibility in mind. An independent audit resulted in zero “does not supports” for WCAG criteria for the desktop version as well as the app versions (iOS & Android). All versions now support multimedia content interactions such as closed captioning for embedded videos and appropriate descriptions for audio, video & captions. Recent upgrades ensure that users can maintain logical & consistent focus order in menu interactions; that the highlight tool is color-compliant; and that users will not encounter any keyboard traps. Additional remediation will continue. The ReadAnywhere App has undergone multiple audits covering the major features resulting in both ReadAnywhere iOS and Android apps having a VPAT. Audits are planned to ensure continual improvement and compliance with WCAG standards. SmartBook 2.0 provides a student experience that includes color contrast, descriptions for images, keyboard navigation, and screen reader support. Work is ongoing to improve the user experience for all users. A VPAT for the WCAG AA standards is available upon request as well as an updated Accessibility Conformance Report reflecting recent updates.
eBook images have alternative descriptions/alternative text	Alt descriptions are embedded within the eBook. Students using some forms of assistive technology may find it difficult to navigate to some of the content, due to the constraints of the technologies available. A file containing the alt descriptions can

	be supplied upon request. To request, please contact us at accessibility@mheducation.com
PowerPoint	PPT's have been prepared to be compliant with WCAG Level AA guidelines.
Videos are closed captioned and/or transcripts are available	Videos offer closed captioning, video descriptions and transcripts. To request transcripts, please contact us at the information listed above.
Assessments can be accessed using alternative output devices (screen reader)	<p>The Anatomy and Physiology Revealed (APR) Connect Assignment allows instructors to build customized assignments in APR that uses content from anatomy dissections, rotatable 3D models, anatomical models, histological images, radiological images, animations, and quizzes. The APR Connect Assignment received a VPAT in fall 2022. The APR Connect Assignment is WCAG 2.1 AA Compliant with 35 Supports, 4 Partially Supports, and 0 Does Not Support.</p> <p>Our new click and drag tool assessment tool is now available. A VPAT is anticipated spring 2023.</p> <p>Connect Assessment is the question bank assignment experience inside of the Connect platform used for a wide range of summative assessments including practice, homework, quizzes, and exams. Connect Assessment is WCAG 2.1 AA Compliant with 48 Supports and 2 Partially Supports ratings for the following 18 questions types:</p> <ul style="list-style-type: none"> Multiple Choice True/False Yes/No Check All that Apply Fill-in-Blank Numeric Response Essay Short Answer Ranking/Ordering Matching Section Break <p>Worksheet: Multiple Choice radio button and dropdown, Check All that Apply, Fill-in-the-Blank, Numeric, True/False, Essay</p>
Application Based Activities (ABA's)	This title does not include Application Based Activities (ABA)
Adaptive Learning Assignment	The Adaptive Learning Assignment is an assignment type within our latest Connect Master products. This assignment provides a learning experience that adapts to the unique needs of each learner through ongoing formative assessment, feedback, and learning r
Virtual Labs	Our virtual labs have been created with accessibility in mind. Effective use of color, keyboard navigation and some screen

	reader capabilities are present. A VPAT is available upon request.
Additional Resources	The Anatomy and Physiology Revealed (APR) Connect Assignment allows instructors to build customized assignments in APR that uses content from anatomy dissections, rotatable 3D models, anatomical models, histological images, radiological images, animations, and quizzes. The APR Connect Assignment received a VPAT in fall 2022. The APR Connect Assignment is WCAG 2.1 AA Compliant with 35 Supports, 4 Partially Supports, and 0 Does Not Support. Due to constraints of the technology upon which it was built, Ph.I.L.S 4.0 is not fully accessible. MHE is actively working on other options that will enable a much more accessible experience for students with disabilities.
Writing Assignment	McGraw Hill's new Writing Assignment tool delivers a learning experience that improves students' written communication skills and conceptual understanding with every assignment. Writing Assignment is WCAG 2.1 AA Compliant with 49 Supports and 1 Partially

We are committed to working with our education partners as we progress in our accessibility efforts. In the event that alternative content formats are required, we will evaluate the options and, when possible, provide as needed.
