

connect[®]

Affordable and Flexible.

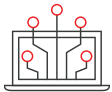

All the content you need for Introduction to Engineering in one place.

Choose the content you want from the BEST Collection (Basic Engineering Series and Tools) or combine any of these materials with your own uploaded content to create the perfect print or digital text for your course.

- Your students only pay for the content they need.
- Save time grading, while giving students unlimited practice and instant feedback.

Connect, McGraw Hill's online homework system, integrates with your LMS and has curated question banks aligned to the content in the BEST Collection.

Features in Connect for this collection include:

Application-Based Activities

SmartBook Adaptive Reading Assignments

Writing Rubrics

Adaptive Prep Modules covering pre-req topics

Curated, auto-graded question banks

The BEST Collection spans 100+ topics of pertinent content, providing students with quality material in these key areas:

Engineering Fundamentals

- Accounting
- Basic Circuit Analysis
- Chemistry
- Mechanics
- Thermodynamics
- Unit Conversions

Engineering Basics

- Design Concepts
- Ethics
- Examples of Professional Engineers
- Overview of each Engineering dept.
- Problem Solving
- Study Skills

Computational Tools

- Excel
- General Computational Tools
- General Math
- MATLAB

Engineering Graphics

- SOLIDWORKS

Communications

- Technical Communications
- Technical Writing

Engineering Management & Economics

- Engineering Economics
- Teamwork & Project Management

Select one of our 7 textbooks in the BEST Collection or pick and choose the topics from these market-leading textbooks that align to your course.
