

Management Application-Based Activities

Available in Connect

Our Connect **Application-Based Activities (ABAs)** are highly interactive activities that challenge students to use problem-solving skills and apply their knowledge to realistic scenarios. Students are placed in a specific role in which they are required to apply multiple concepts and make data-informed decisions. They progress from understanding basic concepts to analyzing complex scenarios and solving problems.

These **Role Playing** activities compel students to think critically and solve real-world problems by applying their skills and knowledge. These “mini sims” often involve multiple decision-making paths -- a “Choose Your Own Adventure” -- and allow students to see the impact of their decisions immediately. Each activity focuses on one topic and is intended to take **approximately 10-15 minutes** to complete. There are objective questions, as well as branching and looping questions, where students can select optimal, sub-optimal, and incorrect responses.

Additionally, you may also notice that there are **Self Assessments** in this category. These introspective, research-based surveys elicit feedback about oneself to promote student self-awareness and self-reflection. As a learning science company, we created these Application-Based Activities to help students develop their higher-order thinking skills aligned with Bloom’s Taxonomy. By assigning these activities, you can help students move from simple memorization to concept application.

Management Application-Based Activities

Application-Based Activities provide students with valuable practice using problem-solving skills to apply their knowledge to realistic scenarios. Students progress from understanding basic concepts to analyzing complex scenarios and solving problems. Review our list of titles to see what is available for your course areas (✓ denotes that a title contains Self-Assessments).
