# Tips for Updating Your Connect Assignment after an Evergreen Release

Evergreen is a new product delivery model and experience that provides content currency, new tools, and the most updated accessibility standards delivered directly to your existing Connect course, all without having to switch editions or build a new course.

## Review the Release Notes

Release notes provide an overview of the updates made to the content by chapter. Review the release notes to understand the concepts that were updated. Activities, assessments and instructor resources will also be updated for those concepts. Release notes can be found posted within Connect on your My Courses page and the section dashboard. For additional assistance with finding release notes watch the video [HERE](#).

## Review the Question Bank Content Map (if available)

The Question Bank Content Map provides a question-by-question inventory of updates made to activities and assessments in the Connect Question Bank only. Other assignment types (SmartBook, Application-Based Activities, Virtual Labs, etc.) are not included. If you copy your course after the Connect release date, any activities or assessments impacted in your existing assignments will be managed as outlined below.

- 1 UPDATED** questions you have in existing assignments will automatically receive the content updates. Updated questions include changes that align with updates made to the narrative, currency, data, etc. These questions still support the same topic that they did before the updates. You may want to review the questions to better understand the changes made.
- 2 UPDATED\*** questions include minor updates that don't impact the essence of the question (accessibility updates, minor edits, and question title/number changes). You don't need to review the questions but will want to be aware of question title/number changes.
- 3 DELETED** questions are deleted from McGraw Hill's main question bank but are not deleted from your existing assignments. We recommend removing deleted questions from your assignments, as the questions will not be updated by McGraw Hill moving forward.
- 4 NEW** questions will not automatically be added to your existing assignments. We recommend reviewing new questions and adding to your assignments at your discretion.
