

GoReact - Editing a Video Capture Assignment

Note: Editing a Video Capture/GoReact assignment is available prior to students accessing the assignment. Once students access this assignment turning it “active,” you will have limited editing functionality.

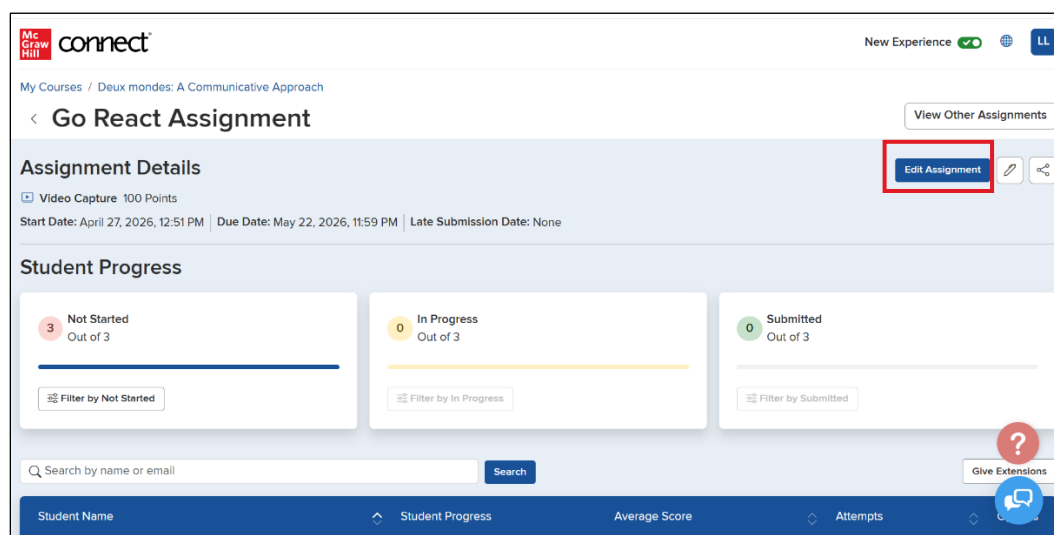

Step 1: Open the Assignment in Connect

From your Connect course homepage, locate the Video Capture Assignment you want to edit and click on the assignment title.

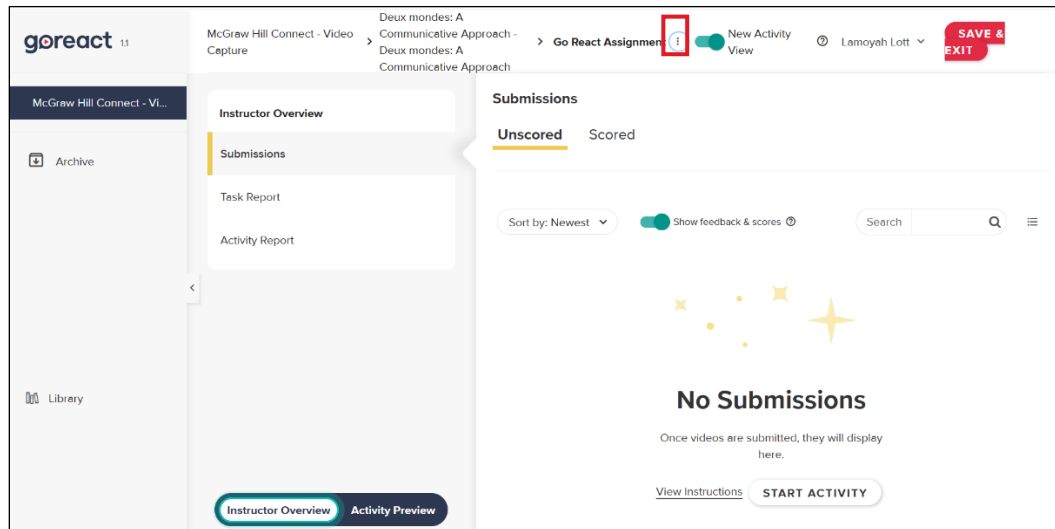

Step 2: Select Edit Assignment

Once the assignment opens, look toward the upper right area of the and press **edit assignment**.

Step 3: Open GoReact Edit panel

Look toward the upper area of the screen for the More Options menu represented by **three dots**. Click it and choose **Edit**.

Step 4: Modify Assignment Settings in GoReact

After selecting “edit,” you can review the GoReact editing panel where the current assignment settings can be located and changed.

Inside this panel, you can make updates to several sections of the assignment. These include the activity details, the recording and feedback privacy settings, comment privacy settings, recording settings, feedback settings, AI Assistant options, and any previously attached rubrics or marker sets.
