

My Courses Page Overview

Step 1: My Courses

The **My Courses** page is your main dashboard for managing courses in McGraw Hill Connect. Your courses are listed with the most recently created courses appearing first. From this page, you can add a new course, view notifications about upcoming Evergreen content releases, access your course materials, launch the eBook, and see which Evergreen release each course section is using.

Step 2: Evergreen Release

You can select the **Release Details** tab to learn more about an Evergreen release. From there, you can review Release Notes, which summarize updates to the eBook, course content, and digital resources. You can also use **Release Preview** to view upcoming eBook changes and selected updated content before the new release becomes available.

Step 3: Edit Course details

Click the **pencil and paper icon** next to a course to edit the course name and time zone. Select the **plus (+) icon** to add a new section to the course. To access additional course options, click the **three-dot menu**, where you can move the course to Previous, duplicate the course, or delete the course.

The screenshot shows the 'My Courses' page in McGraw Hill Connect. Under the 'Anatomy & Physiology 2026' course, there are two sections listed:

Section Name	Section created	Release	Actions
A&P 2026	July 7, 2026, 11:35 AM	2025	[Checkmark] [Pencil/Paper] [LMS] [Three-dot menu]
A&P	May 13, 2026, 11:16 AM	2025	[Checkmark] [Pencil/Paper] [LMS] [Three-dot menu]

A red box highlights the three-dot menu icon for the 'A&P 2026' section.

Step 4: Edit section details

Next to each section, you can click the **pencil and paper icon** to edit the section name or share the section with another instructor. If the section is paired with a Learning Management System (LMS), an **LMS icon** will appear next to the section name. You can also access the **Student Roster** to view enrolled students. Select the **three-dot menu** for additional options, including duplicating the section, moving the section to Previous, viewing student registration information, or deleting the section.

This screenshot is identical to the one above, showing the 'My Courses' page for 'Anatomy & Physiology 2026'. A red box highlights the three-dot menu icon for the 'A&P 2026' section.

Step 5: Current and previous

When you are finished with a course, such as at the end of a semester, you can move it to the **Previous tab** to keep your Current course list organized. To return to your active courses, simply select the **Current tab**.
