

Set Registration Dates for Your Connect Course

1. Step 1: Set registration dates

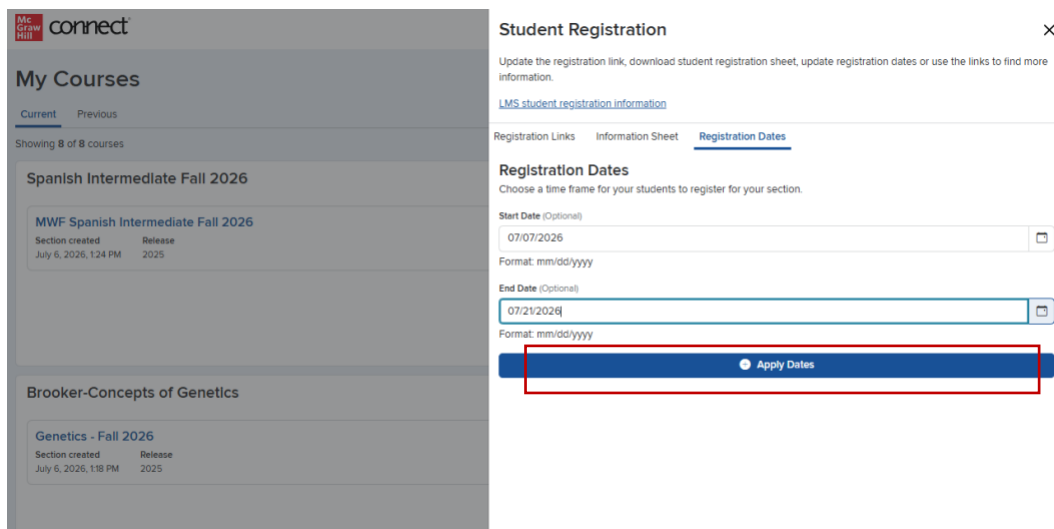

Registration dates allow students to only register for your course between a specified start and end date. This helps you control the roster and prevent unwanted registration. Starting on your My courses page, click the course options menu from the **three dots on the right** and select Set registration dates.

The screenshot shows the 'My Courses' page. At the top, there's a 'Create Course' button. Below it, a list of courses is shown. The first course is 'Spanish Intermediate Fall 2026'. To the right of the course name is a menu with three dots, which is highlighted with a red box. The second course is 'Brooker-Concepts of Genetics'.

2. Step 2: Set registration dates page

Type in the dates for the start and end date or click on the calendar view to select. Once start and end dates are selected, click on the blue Apply Dates.

The screenshot shows the 'Student Registration' dialog box. It has tabs for 'Registration Links', 'Information Sheet', and 'Registration Dates'. The 'Registration Dates' tab is selected. It shows fields for 'Start Date (Optional)' and 'End Date (Optional)', both with calendar icons. Below these fields is a blue button labeled 'Apply Dates', which is highlighted with a red box.
