

Set Registration Dates for Your Connect Course

Video: [CLICK TO VIEW](#)

Registration dates allow students to only register for your course between a specified start and end date. This helps you control the roster and prevent unwanted registration.

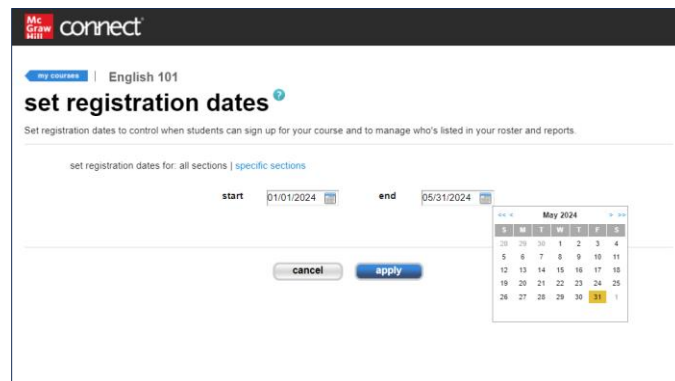

Starting on your **My courses** page, click the **course options** menu from the three dots on the right and select **Set registration dates**.

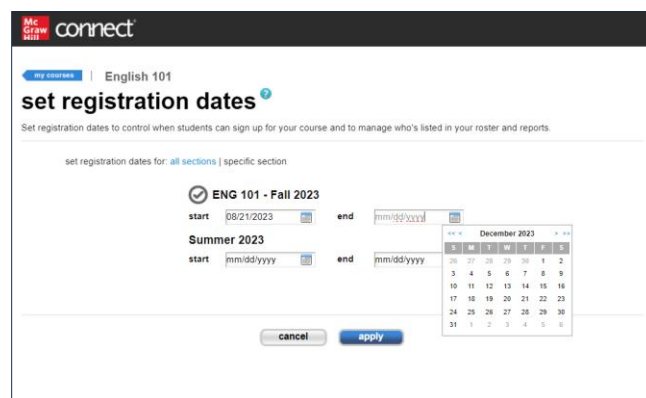

On the **set registration dates** page, you will have two options. You can set the same registration dates for all sections in your course or set different registration dates for specific sections in the same course.

To set registration dates for **all sections in your course**, enter the start and end dates you would like from the calendar dropdown, then click the blue **apply** button at the bottom right.

To set registration dates for **a specific section**, click the blue **specific sections** link and enter the start and end dates you would like for the specific section or sections, then click the blue **apply** button at the bottom right.

You will see a popup message that says, “your registration dates have been updated.”
