Follow these steps to set a new multiple attempts default value for the entire GO section.

STEP 1: In your GO section select the table of contents kebab as shown and select **Set Attempts Allowed** (see next page).

Copying a D2L Course using a McGraw Hill GO Template

Mark a GO Section as a Template

Before copying an existing D2L course that has already been paired with McGraw Hill GO the instructor can *optionally* decide whether certain content management functions will be available in the resulting GO section copy. If a new GO section is a copy of a GO Template then the following functions will be 'locked down' and unavailable to the instructor in that new section:

1. Setting attempts allowed for GO assignments
2. Removing/unassigning GO assignments from the GO section
3. Editing assessments
4. Changing the GO product paired to the D2L course
5. Marking the new section as a Template

The GO Template feature is useful to a course manager who, for example, is required to create copies of a D2L/GO master course and wants to control an adjunct's ability to alter the GO content in the new course copy.

STEP 1: Proceed to your 'master' D2L course which is already paired with McGraw Hill GO and launch **McGraw Hill GO** from the Table of Contents / Content module / Existing Activities menu.

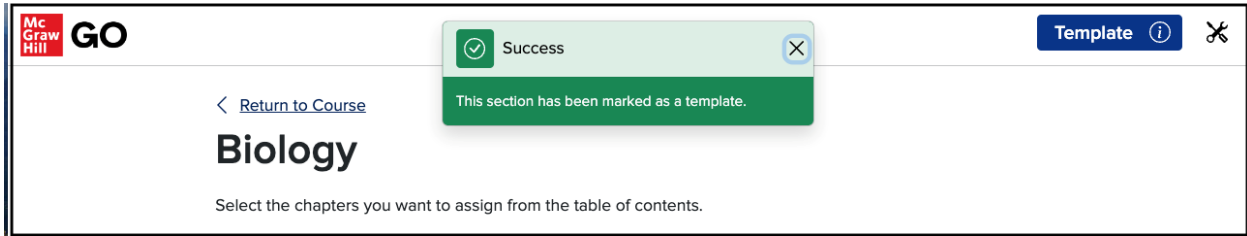

STEP 2: In your GO section select the table of contents kebab as shown and select **Mark as Template**.

The screenshot shows the McGraw Hill GO interface. At the top left is the McGraw Hill logo and the word 'GO'. Below it is a 'Return to Course' link. The main heading is 'Biology'. Below the heading is the instruction: 'Select the chapters you want to assign from the table of contents.' The 'Table of Contents (60)' section is displayed as a table with columns for chapter selection, chapter name, status, and question count. A dropdown menu is open for the second row, 'Chapter 02: The Chemical Basis of Life I: Atoms, Molecules, and Water', which is currently 'Assigned' and has '20 Questions'. The menu options are: 'Set Attempts Allowed', 'Remove All Assignments', 'Change Paired Product', 'Mark as Template' (highlighted with a red border), 'Resync Assignments', and 'Resync All Scores'. The top right of the table shows '0 chapters selected' and a kebab menu icon.

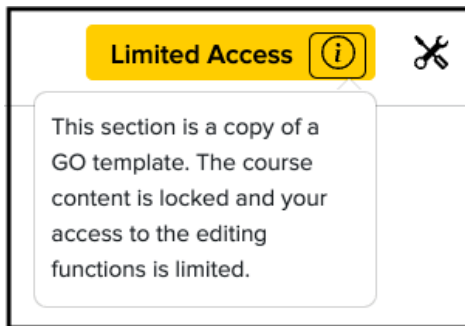

STEP 3: When the Mark as Template modal appears select **Confirm**.

The screenshot shows a modal dialog box titled 'Mark as Template' overlaid on the 'Table of Contents (60)' table. The modal has a close button (X) in the top right corner. The text inside the modal reads: 'You are about to mark this GO section as a template. Any new GO sections copied from this one will be locked down and updates to those sections will not be allowed.' At the bottom of the modal are two buttons: 'Cancel' and 'Confirm'.

GO will briefly display a message that you have successfully marked this GO section as a Template. From this point forward, or until you unmark this GO section as a Template, any new GO sections that are copies of this Template will be 'locked down' and not editable by the instructor.

Further, instructors using a copy of a GO Template will see a banner in their GO section indicating that.
