

# Powerful Reporting for District Literacy Success

Real-time data. Empowered decisions.  
Measurable growth.

With administrator reporting in *Achieve3000 Literacy™*, you can access clear, actionable usage, performance, and growth data for every classroom, teacher, grade, and school. Whether you need high level summaries or filtered views for deeper information, the program's administrator dashboard equips you to identify specific learning needs and scale successful instructional practices.

The **Usage Report** tracks frequency of use and instructional quality, revealing how consistently and effectively the program is driving results—not just how often students and teachers are logging in—to help leaders pinpoint areas for additional support or coaching.

The **Growth Report** shows measurable Lexile® growth tied to program use, providing an overview of grade-level growth trends and proficiency group performance. This data supports college- and career-readiness monitoring and offers clear evidence of program impact and implementation fidelity.

Support district accountability and student growth with *Achieve3000®* Literacy. Start seeing measurable results today.
