25	A.REI.5	Prove that, given a system of two equations in two variables, replacing one equation by the sum of that equation and a multiple of the other produces a system with the same solutions.	TE Volume 2: p. 543a (under Be Sure to Cover and Suggested Pacing) Expand 10-5: Proving the Elimination Method						
26	A.REI.6	Solve systems of linear equations exactly and approximately (e.g., with graphs), focusing on pairs of linear equations in two variables.	TE Volume 2 pp. 391-393 Apply Example 7						
27	A.REI.7	Solve a simple system consisting of a linear equation and a quadratic equation in two variables algebraically and graphically. For example, find the points of intersection between the line $y = -3x$ and the circle $x^2 + y^2 = 3$ .	TE Volume 2 pp. 655-657 Learn, Examples 1-2						
Cluster:	Represent and	solve equations and inequalities graphically.							
28	A.REI.10	Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line).	TE Volume 1 p. 209 Learn TE Volume 2 p. 605 Learn						
29	A.REI.11	Explain why the $x$ -coordinates of the points where the graphs of the equations $y = f(x)$ and $y = g(x)$ intersect are the solutions of the equation $f(x) = g(x)$ ; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.*	TE Volume 2 pp. 387-388 Learn, Examples 1-3 TE Volume 2 p. 390 Examples 5-6						
30	A.REI.12	Graph the solutions to a linear inequality in two variables as a half- plane (excluding the boundary in the case of a strict inequality), and graph the solution set to a system of linear inequalities in two variables as the intersection of the corresponding half-planes.							
DOMAIN:	HS.F-IF Interp	reting Functions		1					
Cluster:	Understand the	e concept of a function and use function notation.							
31	F.IF.1	Understand that a function from one set (called the domain) to another set (called the range) assigns to each element of the domain exactly one element of the range. If $f$ is a function and $x$ is an element of its domain, then $f(x)$ denotes the output of $f$ corresponding to the input $x$ . The graph of $f$ is the graph of the equation $y = f(x)$ .	TE Volume 1 pp. 135-137 Learn, Examples 1-2						
32	F.IF.2	Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context.	TE Volume 1 pp. 147-149 Learn, Examples 1-2						
33	F.IF.3	Recognize that sequences are functions, sometimes defined recursively, whose domain is a subset of the integers. For example, the Fibonacci sequence is defined recursively by $f(0) = f(1) = 1$ , $f(n+1) = f(n) + f(n-1)$ for $n \ge 1$ .	TE Volume 1 p. 251 Learn, Example 1 TE Volume 2 p. 523 Learn, Examples 1-2						
Cluster:	Interpret funct	ions that arise in applications in terms of the context.							
34	F.IF.4	For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; end behavior; and periodicity. *	TE Volume 1 p. 167 Learn, Example 1 TE Volume 1 p. 179 Learn TE Volume 1 p. 195 Example 3						
35	F.IF.5	Relate the domain of a function to its graph and, where applicable, to the quantitative relationship it describes. For example, if the function $h(n)$ gives the number of person-hours it takes to assemble $n$ engines in a factory, then the positive integers would be an appropriate domain for the function. *	TE Volume 1 p. 169 Example 3						
36	F.IF.6	Calculate and interpret the average rate of change of a function (presented symbolically or as a table) over a specified interval. Estimate the rate of change from a graph.*	TE Volume 1 pp. 219-221 Learn, Examples 1-3

#### Section 2: Math Content Review PUBLISHERS/PROVIDERS: • The Math Content Review tab will be completed solely by the reviewers. They will score each criterion and provide evidence for their score from the material based on their overall review of the material. You will not provide any citations for this tab. • The material will be scored for alignment with each criterion as "Meets expectations", "Partially meets expectations", or "Does not meet expectations". Required: Reviewer's Evidence from Material Criteria **Grades K-12 Math Content Criteria** Score Include where you found the evidence in the material and what Comments, citations, notes # evidence you found that supports your score. FOCUS AREA 1: RIGOR AND MATHEMATICAL PRACTICES Materials support student mastery through a grade-appropriate balance of rigor: conceptual understanding, procedural fluency, and application. Materials meaningfully connect the Content Standards (CCSS) with the Standards for Mathematical Practice (SMPs). Conceptual Understanding: Materials support the intentional development of students' 1 conceptual understanding of key mathematical concepts. Procedural Skill and Fluency: Materials support intentional opportunities for students to 2 develop procedural skills and fluencies in alignment with what is called for in the grade-level standards. Application: Materials support students' ability to leverage mathematical skills, concepts, representations, and strategies across a range of contexts, (including applying learning to real-world situations and new contexts). Balance of Rigor: With equitable intensity The three aspects of rigor are not always treated together and are not always treated separately. The three aspects are balanced with respect to the standards being addressed in each grade level. SMPs 1 and 6 Materials support the intentional development of making 5 sense of problems and attending to precision as required by the mathematical practice standards 1 and 6. SMPs 2 and 3 Materials support the intentional development of reasoning abstractly and quantitatively, along with developing viable arguments and critiquing the reasoning of others, in connection to the content standards, as required by the practice standards 2 and 3. SMPs 4 and 5 Materials support the intentional development of modeling and using tools, in connection to the content standards, as required by the mathematical practice standards 4 and 5. SMPs 7 and 8 Materials support the intentional development of seeing 8 structure and generalizing, in connection to the content standards, as required by the mathematical practice

### FOCUS AREA 2: STUDENT CENTERED INSTRUCTION

standards 7 and 8.

Materials contain embedded resources (routines, strategies, and pedagogical suggestions) to support all students in developing a positive mathematical identity, cultivating self-efficacy, and seeing themselves as a contributor to the math community.

9	Materials provide students with opportunities to develop		
	self-efficacy and a positive mathematical identity through		
	opportunities to engage in grade-level tasks using various		
	sharing strategies and approaches.		
10	Materials provide opportunities for students to see		
	themselves as contributors to the math community.		

#### FOCUS AREA 3: INSTRUCTIONAL SUPPORTS FOR ALL STAKEHOLDERS

Materials provide guidance and resources to support educators in internalizing the mathematical content and providing responsive and differentiated instruction to all students. Materials contain helpful resources to support implementation and instruction (e.g. materials for leaders, teachers, students, families/ caregivers, etc).

## Section 2: Math Content Review

#### PUBLISHERS/PROVIDERS:

- The Math Content Review tab will be completed solely by the reviewers. They will score each criterion and provide evidence for their score from the material based on their overall review of the material. You will not provide any citations for this tab.
- The material will be scored for alignment with each criterion as "Meets expectations", "Partially meets expectations", or "Does not meet expectations".

Criteria #	Grades K-12 Math Content Criteria	Score	Required: Reviewer's Evidence from Material Include where you found the evidence in the material and what evidence you found that supports your score.	Comments, citations, notes
11	Teacher materials contain full, adult-level explanations and examples of the mathematics concepts within lessons so teachers can improve their own knowledge of the subject. Materials are in print or clearly distinguished/accessible as a teacher's edition in digital materials.			
12	The materials provide guidance for unit/lesson preparation to support use of the materials as intended and to further develop the teachers' own understanding of the mathematical approach.			
13	Teacher materials provide insight into students' ways of thinking with respect to important mathematical concepts, especially anticipating a variety of student responses.			
14	Materials contain strategies for informing parents or caregivers about the mathematics program and suggestions for how they can help support student progress and achievement.			

#### Section 2: All Content Review PUBLISHERS/PROVIDERS: • The All Content Review tab will be completed solely by the reviewers. They will score each criterion and provide evidence for their score from the material based on their overall review of the material. You will not provide any citations for this tab. • The material will be scored for alignment with each criterion as "Meets expectations", "Partially meets expectations", or "Does not meet expectations". Required: Reviewer's Evidence from Material Criteria **All Content Criteria Review** Score Include where you found the evidence in the material and what Comments, citations, notes evidence you found that supports your score. **FOCUS AREA 1: COHERENCE** Instructional materials are coherent and consistent with the New Mexico Content Standards that all students should study in order to be college- and career-ready. Instructional materials address the full content contained 1 in the standards for all students by grade level. Instructional materials support students to show mastery 2 of each standard. Instructional materials require students to engage at a level of maturity appropriate to the grade level under review. Instructional materials are coherent, making meaningful connections for students by linking the standards within a lesson and unit. FOCUS AREA 2: WELL-DESIGNED LESSONS Instructional materials take into account effective lesson structure and pacing. The Teacher Edition presents learning progressions to provide an overview of the scope and sequence of skills 5 and concepts. The design of the assignments shows a purposeful sequencing of teaching and learning expectations. Within each lesson of the instructional materials, there are clear, measurable, standards-aligned content objectives. Within each lesson of the instructional materials, there are 7 clear, measurable language objectives tied directly to the content objectives. Instructional materials provide focused resources to support students' acquisition of both general academic vocabulary and content-specific vocabulary. The visual design of the instructional materials (whether in 9 print or digital) maintains a consistent layout that supports student engagement with the subject. Instructional materials incorporate features that aid 10 students and teachers in making meaning of the text. Instructional materials provide students with ongoing review and practice for the purpose of retaining previously acquired knowledge. **FOCUS AREA 3: RESOURCES FOR PLANNING** Instructional materials provide teacher resources to support planning, learning, and understanding of the New Mexico Content Standards. Instructional materials provide a list of lessons in the Teacher Edition (in print or clearly distinguished/ accessible as a teacher's edition in digital materials), cross-referencing 12 the standards addressed and providing an estimated instructional time for each lesson, chapter, and unit. Instructional materials support teachers with instructional 13 strategies to help guide students' academic development. Instructional materials include a teacher edition/ teacherfacing material with useful annotations and suggestions on how to present the content in the student edition/studentfacing material and in the supporting material. Instructional materials integrate opportunities for digital learning, including interactive digital components. **FOCUS AREA 4: ASSESSMENT**

Instructional materials offer teachers a variety of assessment resources and tools to collect ongoing data about student progress related to the standards.

## Section 2: All Content Review

#### PUBLISHERS/PROVIDERS:

- The All Content Review tab will be completed solely by the reviewers. They will score each criterion and provide evidence for their score from the material based on their overall review of the material. You will not provide any citations for this tab.
- The material will be scored for alignment with each criterion as "Meets expectations", "Partially meets expectations", or "Does not meet expectations".

"Does i	not meet expectations".			
Criteria #	All Content Criteria Review	Score	Required: Reviewer's Evidence from Material Include where you found the evidence in the material and what evidence you found that supports your score.	Comments, citations, notes
16	Instructional materials provide a variety of assessments that measure student progress in all strands of the standards for the content under review.  (Adopted New Mexico Content Standards for 2025: CCSS for Mathematics.)			
17	Instructional materials provide multiple formative and summative assessments, clearly defining which standards are being assessed through content and language objectives.			
18	Instructional materials provide scoring guides for assessments that are aligned with the standards they address, and that offer teachers guidance in interpreting student performance and suggestions for further instruction, differentiation, and/or acceleration.			
19	Instructional materials provide appropriate assessment alternatives for English Learners, Culturally and Linguistically Diverse students, advanced students, and special needs students.			
20	Instructional materials include opportunities to assess student understanding and knowledge of the standards using technology.			
	REA 5: EXTENSIVE SUPPORT onal materials give all students extensive opportunities and	support to	explore key concepts.	
21	Instructional materials can be customized or adapted to			
22	meet the needs of different student populations.  Instructional materials provide differentiated strategies and/or activities to meet the needs of students working			
23	below proficiency and those of advanced learners.  Instructional materials provide appropriate linguistic support for English Learners and Culturally and Linguistically Diverse students, and accommodations and modifications for other special populations that will support their regular and active participation in learning content.			
24	Instructional materials provide strategies and resources for teachers to inform and engage parents, family members, and caregivers of all learners about the program and provide suggestions for how they can help support student progress and achievement.			
25	Instructional materials include opportunities for all students that encourage and support critical and creative thinking, inquiry, and complex problem-solving skills.			
	REA 6: CULTURAL AND LINGUISTIC PERSPECTIVES onal materials represent a variety of cultural and linguistic p	erspective	5.	
26	Instructional materials inform culturally and linguistically responsive pedagogy by affirming students' backgrounds in the materials themselves and in the student discussions.			
27	Instructional materials provide a collection of images, stories, and information, representing a broad range of demographic groups, and do not make generalizations or reinforce stereotypes.			
28	Instructional materials provide context, illustrations, and activities for students to make interdisciplinary connections and/or connections to real-life experiences and diverse cultural and linguistic backgrounds.			
	REA 7: INCLUSION OF CULTURALLY AND LINGUISTICALLY REsonal materials highlight diversity in culture and language thr

## Section 2: All Content Review

#### PUBLISHERS/PROVIDERS:

- The All Content Review tab will be completed solely by the reviewers. They will score each criterion and provide evidence for their score from the material based on their overall review of the material. You will not provide any citations for this tab.
- The material will be scored for alignment with each criterion as "Meets expectations", "Partially meets expectations", or "Does not meet expectations".

Criteria #	All Content Criteria Review	Score	Required: Reviewer's Evidence from Material Include where you found the evidence in the material and what evidence you found that supports your score.	Comments, citations, notes
30	Instructional materials include tools and resources that			
	demonstrate multiple perspectives in a specific concept.			
31	Instructional materials engage students in critical reflection			
	about their own lives and societies, including cultures past			
	and present in New Mexico.			
32	Instructional materials address multiple ethnic			
	descriptions, interpretations, or perspectives of events and			
	experiences.
