

MH Assess - Assignment Sync and Grade Passback with Google Classroom™

For Single Sign-On and Auto-Rostering Districts Only

The McGraw Hill K-12 for Google Classroom™ app syncs assignments and grades between the programs hosted on the McGraw Hill platform and your Google Classroom account.

This document was last updated 1/5/2026. Be sure to view the most up-to-date version by checking our [DTS community help site page](#).

IMPORTANT!

The integration reviewed in this article is not the same as the “Share with Google Classroom” options available within the McGraw Hill platform, nor do these integrations work together. **You cannot use both.** Attempting to use both will prevent both from working properly.

Class Pairing

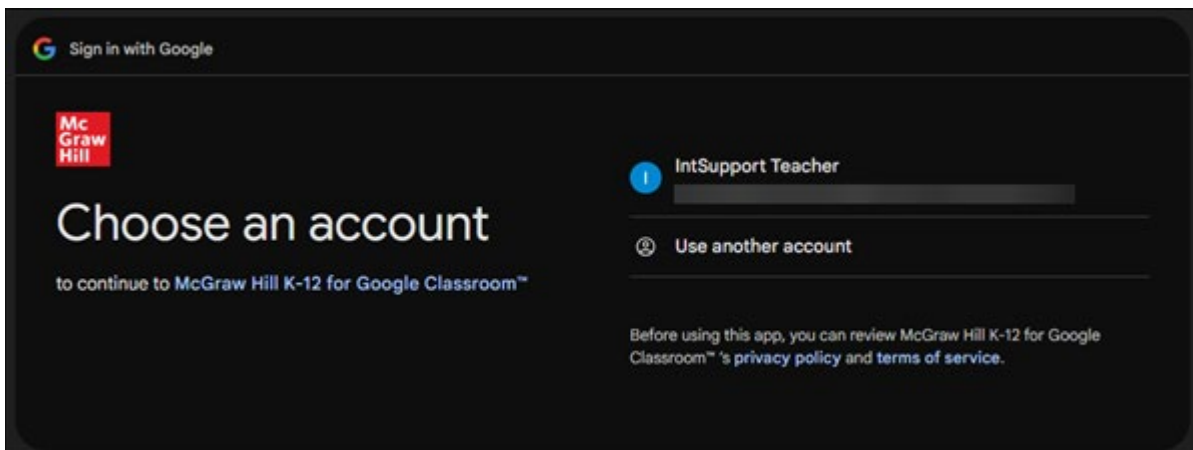

Prior to syncing assignments and grades between your McGraw Hill classes and Google Classroom, you need to pair your class(es). Your McGraw Hill class is automatically generated by your district's nightly roster file sent to McGraw Hill.

1. Click on the **Google apps** icon at the top-right of the page.
2. Click on the **McGraw Hill K-12 for Google Classroom™** app.

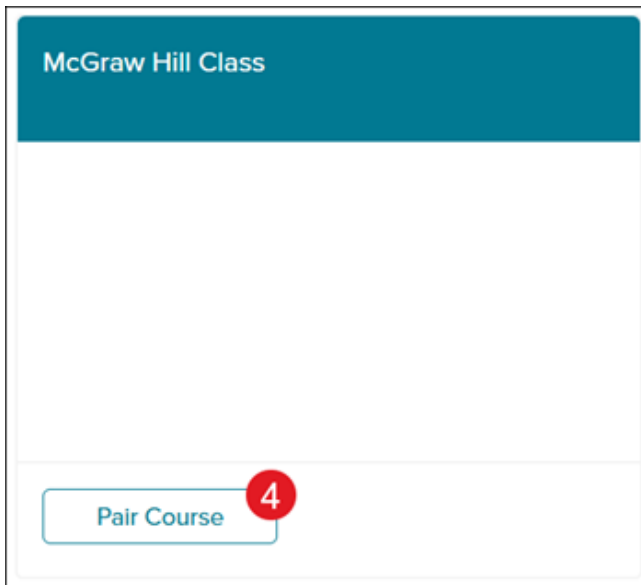

Note: Installation of this app is completed by your District Administrator. If you do not see the app, please reach out to your District Administrator or Curriculum Coordinator.

3. If prompted, select the Google account you would like to use.

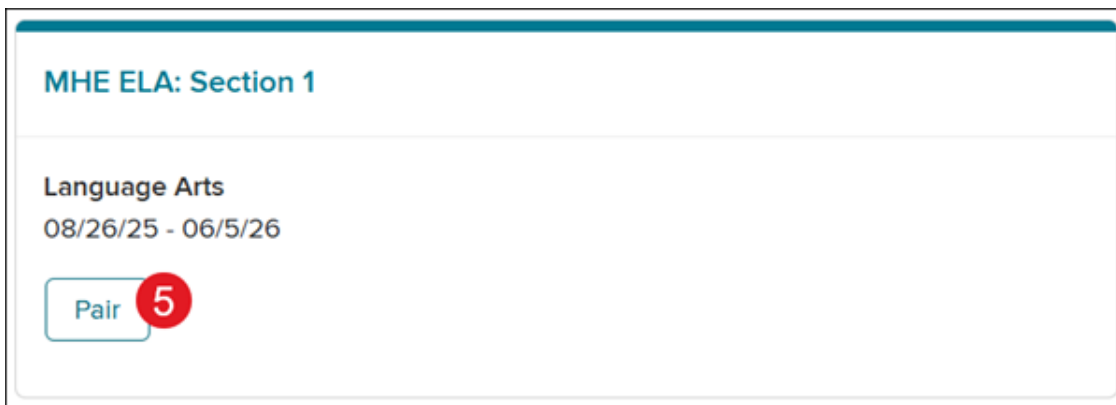

4. Click the **Pair Course** button on the class tile.

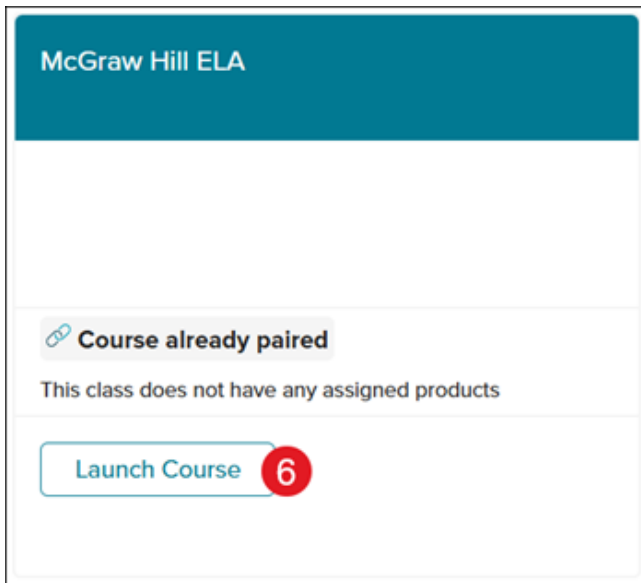

5. Click the **Pair** button.

Important! Make sure to only click Pair on the course tile that matches the class you selected.

Stop and Double Check - Take time to double check and ensure your class pairings are correct before moving on. Incorrect class pairings, and any resulting issues, is a common issue.

6. Click the **Launch Course** button to create assessments.

Unpairing Classes

If a class has been paired by mistake and/or incorrectly, you can unpair it. Only classes paired in error should be unpaired.

Note: McGraw Hill content and assignments will not launch from Google Classroom if you unpair the class.

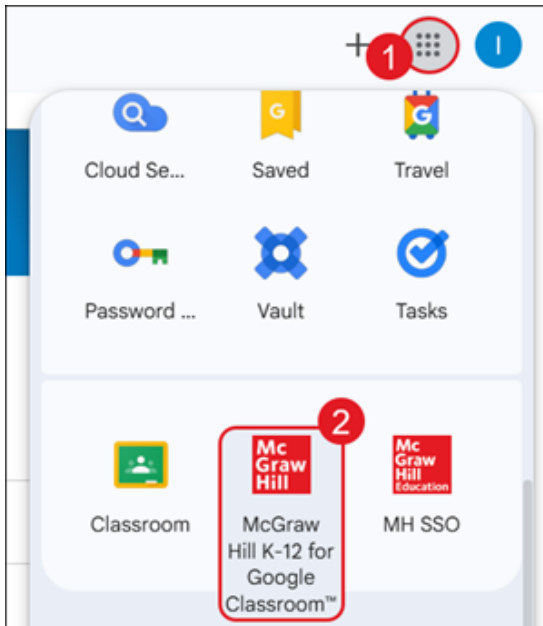

IMPORTANT!

If a Google Classroom class is deleted prior to unpairing it from the McGraw Hill class, you will not be able to fully unpair it. You **MUST** first unpair the classes **before** deleting or unlinking the Google Classroom class.

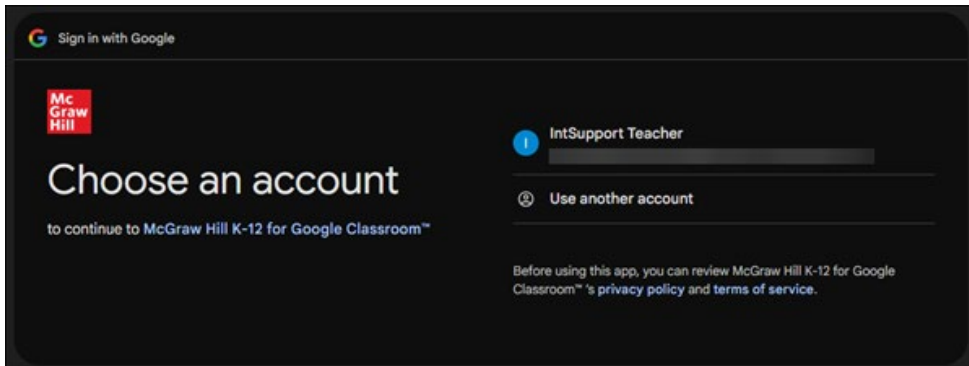

If you deleted a Google Classroom class before unpairing it, you will need to contact our [DTS Customer Support](#) team.

1. Click on the **Google apps** icon at the top-right of the page.
2. Click on the **McGraw Hill K-12 for Google Classroom™** app.

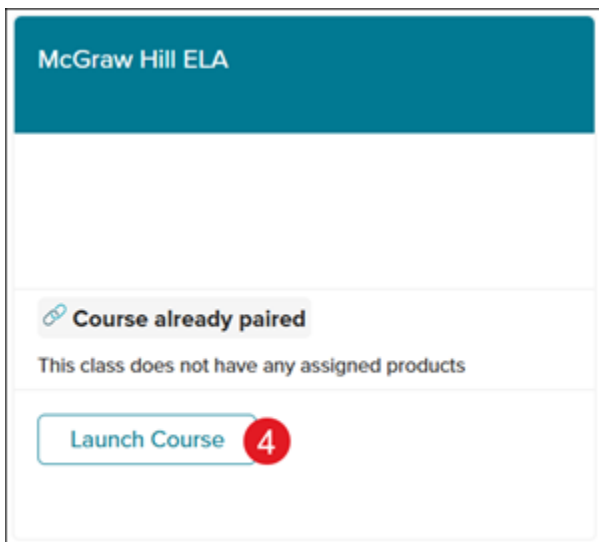

Note: Installation of this app is completed by your District Administrator. If you do not see the app, please reach out to your District Administrator or Curriculum Coordinator.

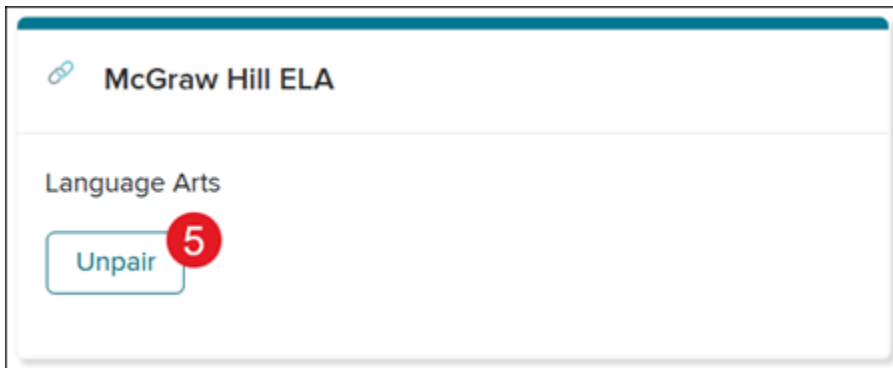

3. If prompted, select the Google account you would like to use.

4. Click the **Launch Course** button on the class tile.

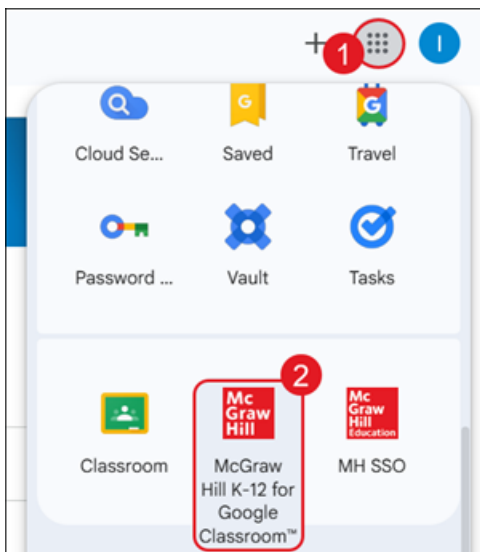

5. Click the **Unpair** button.

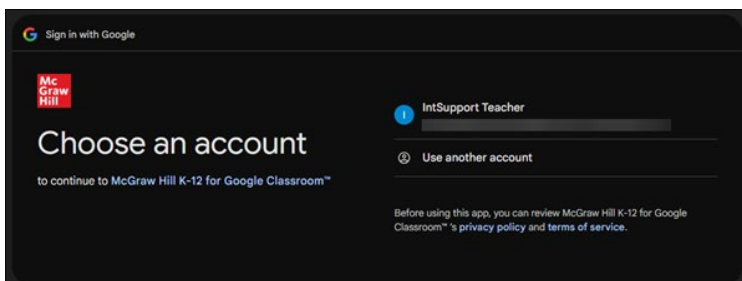

Create Assessments

1. Click on the **Google apps** icon at the top-right of the page.
2. Click on the **McGraw Hill K-12 for Google Classroom™** app.

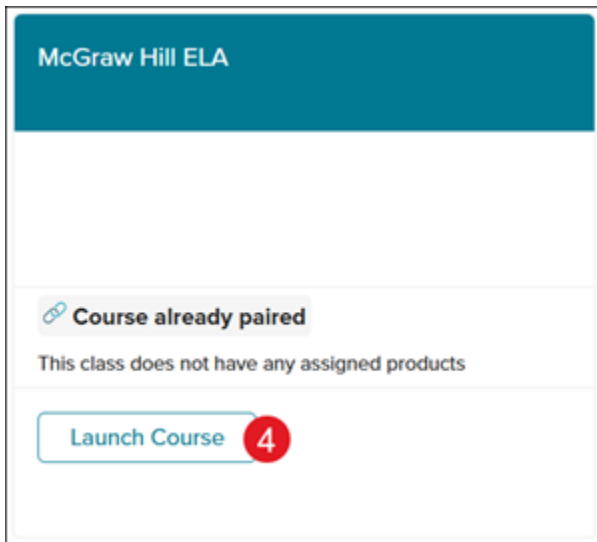

Note: Installation of this app is completed by your District Administrator. If you do not see the app, please reach out to your District Administrator or Curriculum Coordinator.

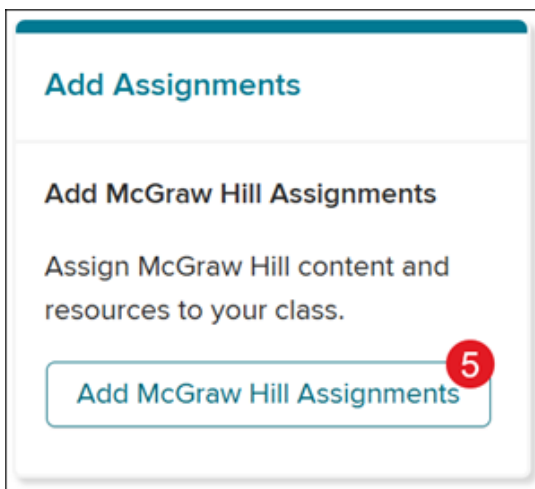

3. If prompted, select the Google account you would like to use.

4. Click the **Launch Course** button on the class tile.

5. Click the **Add McGraw Hill Assignments** button.

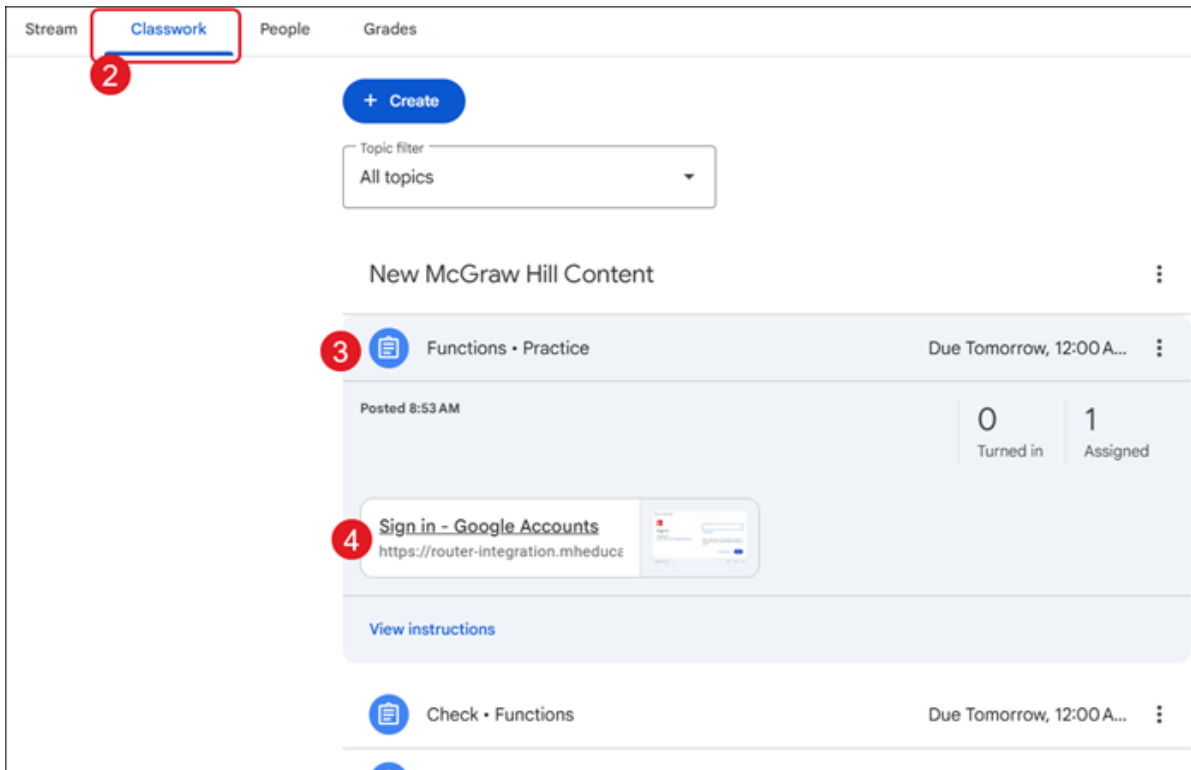

For in-depth steps on creating, editing, and assigning assessments, refer to the [MH Assess - Assessment Management Resources](#) article.

Wait for the screen to close automatically. This will take around 10-20 seconds to process your new assessment before closing the screen. **If you close the screen manually, your assessments will not be created successfully.**

View Assessments

1. From your **Classroom** page, click on the class name.
2. Click on **Classwork**.
3. Click on the assignment blade to expand.

4. Click the **Sign in – Google Accounts** button.

The assignment will open in a new tab on the my.mheducation.com site.

Note: It may take 2-3 minutes for assessments to appear for students and before the assignment can be successfully launched within Google Classroom. If you attempt to launch the assignment too quickly after creation, both students and teachers will receive a ["CI2" error message](#).

Adjust Assessment Settings

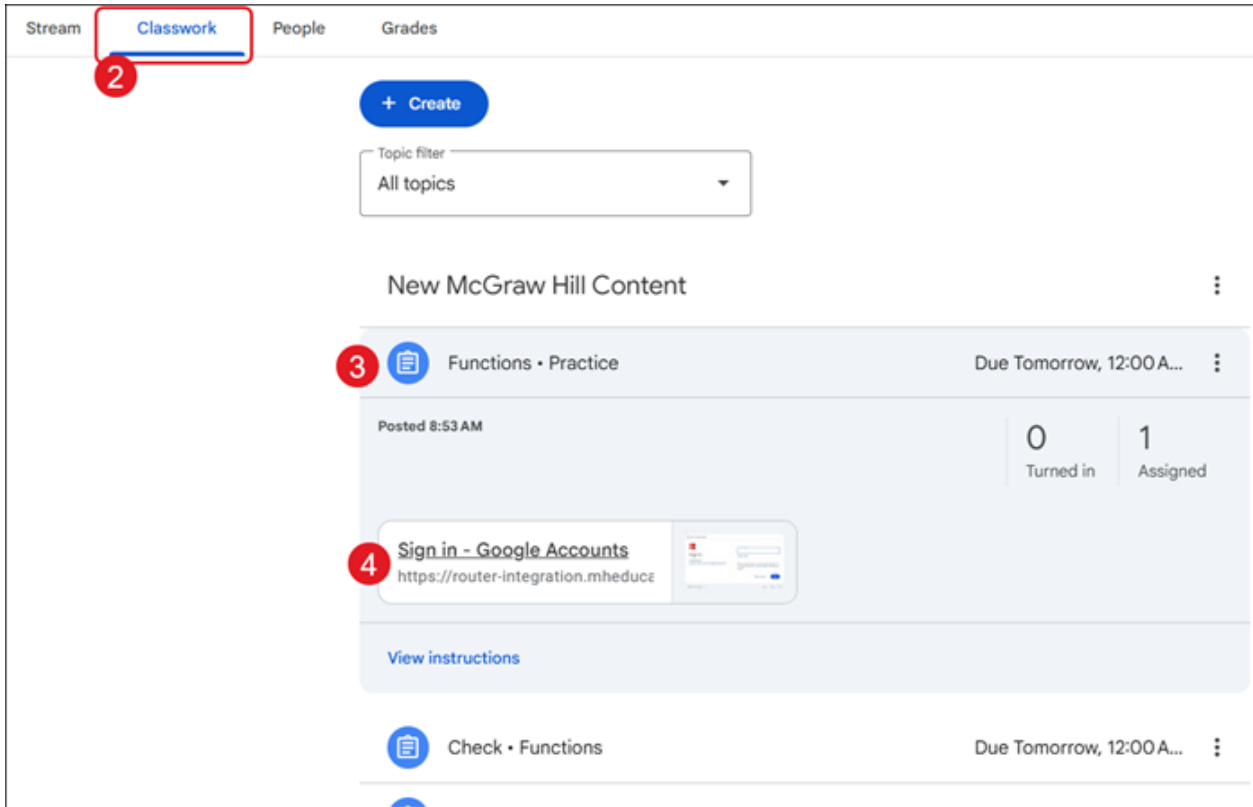

IMPORTANT!

If you need to later make adjustments to the settings of an assessment, you must complete these changes within the McGraw Hill platform directly, or by launching the assessment as a teacher in Google Classroom.

If you attempt to make assessment edits within Google Classroom directly, they will not be reflected within McGraw Hill and may result in stopping the assessment from functioning in Google Classroom.

1. From your **Classroom** page, click on the class name.
2. Click on **Classwork**.

3. Click on the assignment blade to expand.
4. Click the **Sign in – Google Accounts** button.

The assignment will open in a new tab on the my.mheducation.com site.

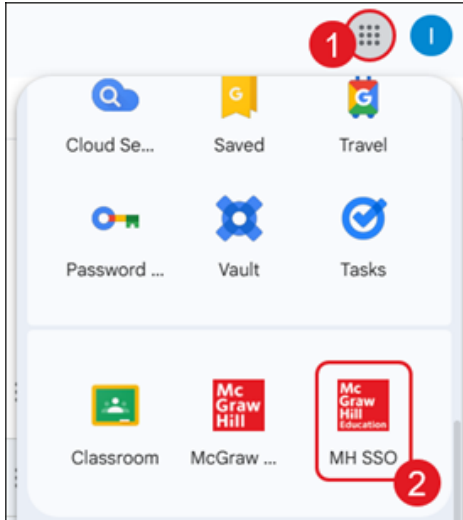

5. Click the **Settings** tab.

6. Make preferred changes to the settings.
7. Click the **Save** button.

Alternative Option: Edit from McGraw Hill Platform

1. Click on the **Google apps** icon at the top-right of the page.
2. Click on the **McGraw Hill SSO** app.

4. Navigate to the assessment.
5. Make preferred changes to the settings.
6. Click the **Save** button.

These changes will not be reflected in Google Classroom until you have [resynced the assessments](#).

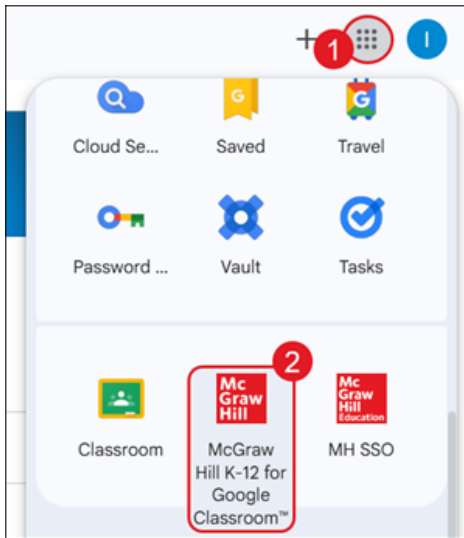

Resync Assessments

Resyncing assessments is an option available within the McGraw Hill K-12 for Google Classroom™ app. This option syncs all assessments and their settings *from* McGraw Hill *into* Google Classroom.

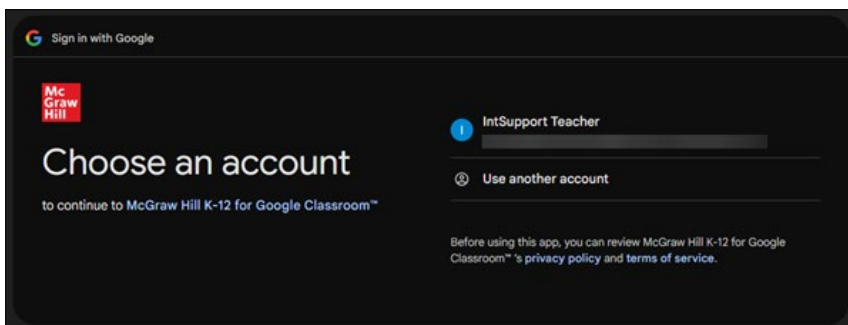

This allows you to sync settings back into Google Classroom if you made any changes to your assessments. This also gives teachers a direct way to manually trigger the assessment syncing process in the event any assessments have not automatically appeared in Google Classroom.

1. Click on the **Google apps** icon at the top-right of the page.
2. Click on the **McGraw Hill K-12 for Google Classroom™** app.

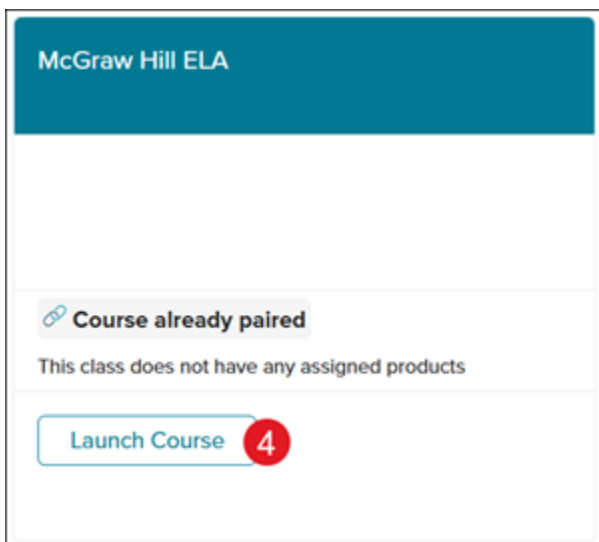

Note: Installation of this app is completed by your District Administrator. If you do not see the app, please reach out to your District Administrator or Curriculum Coordinator.

3. If prompted, select the Google account you would like to use.

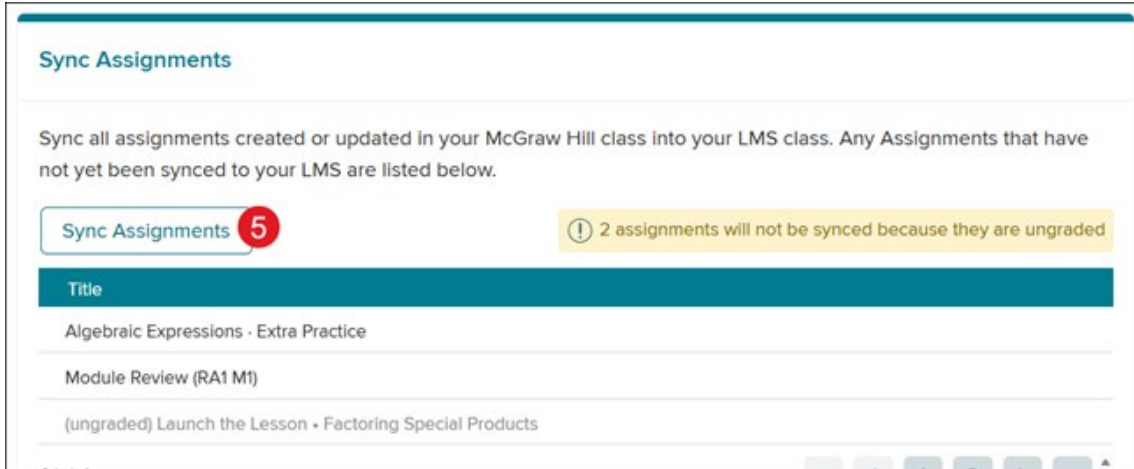

4. Click the **Launch Course** button on the class tile.

5. Click the **Sync Assignments** button.

McGraw Hill will automatically check to see if there are any assignments that have not yet been completed synced to Google Classroom. These will be listed in the area below the Sync Assignments button.

Grade Completed Assessments

Assessments can be graded from within Google Classroom by launching the assignment. As a teacher, launching the assignment automatically brings you to the assignment submissions page in a new tab.

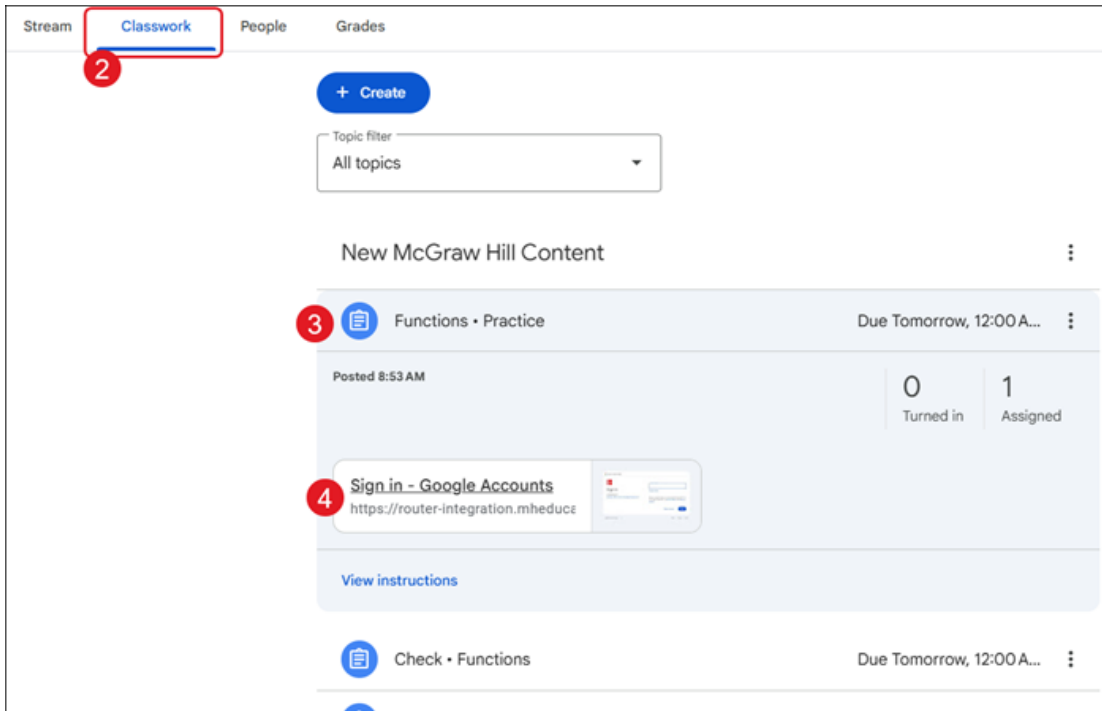

IMPORTANT!

Student should access their first assignment through Google Classroom. This allows the McGraw Hill platform to begin syncing grades for that student to Google Classroom.

The student does not need to complete the assignment within Google Classroom if they would rather complete it within the McGraw Hill platform, they just need to launch it from the Google Classroom platform.

After the initial launch, students can then access and complete assessments through Google Classroom or the McGraw Hill platform.

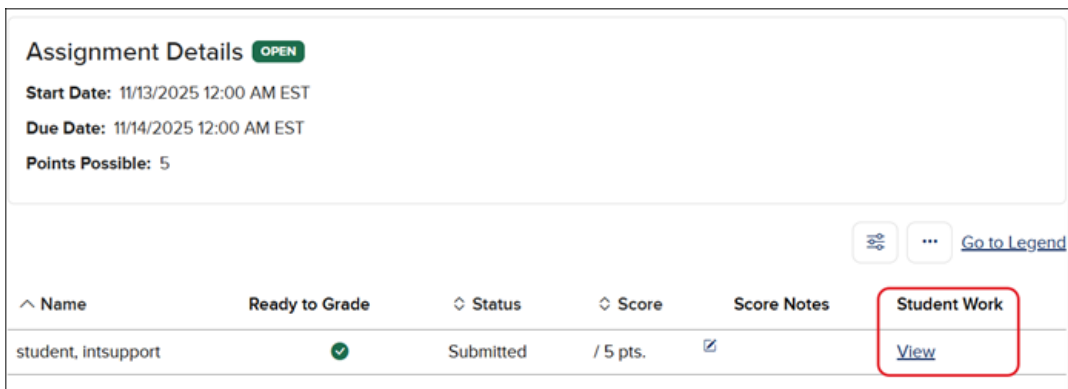

1. From your **Classroom** page, click on the class name.
2. Click on **Classwork**.
3. Click on the assignment blade to expand.
4. Click the **Sign in – Google Accounts** button.

The assignment will open in a new tab on the my.mheducation.com site.

5. Depending on the assignment type, click the **View Scoresheet** link in the **Student Work** column.

For in-depth instructions on grading assessments, refer to the Grade Assessments section of the [MH Assess - Assessment Management Resources](#) article.

Grades will automatically sync to the Google Classroom gradebook and can be viewed by clicking the **Grades** tab.

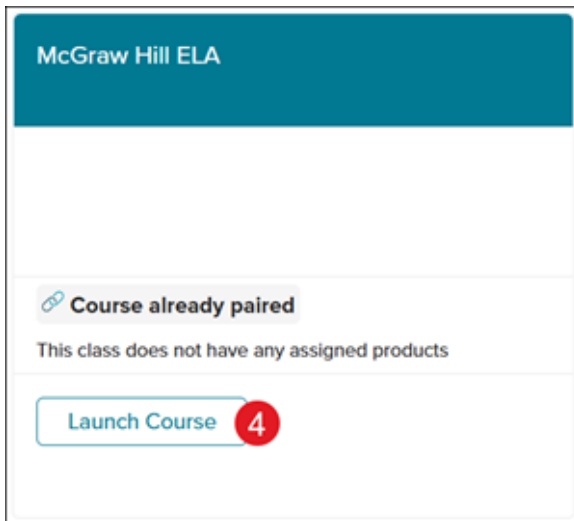

Resync Grades

1. Click on the **Google apps** icon at the top-right of the page.
2. Click on the **McGraw Hill K-12 for Google Classroom™** app.

Note: Installation of this app is completed by your District Administrator. If you do not see the app, please reach out to your District Administrator or Curriculum Coordinator.

3. If prompted, select the Google account you would like to use.
4. Click the **Launch Course** button on the class tile.

5. On the **Re-Sync Grades** tile, checkmark the assignment(s) that needs to be resynced.
6. Click the **Sync Grades** button.

Troubleshooting Tips

Error Messages on Student Launch

Common Errors: ID5, ER4, SE4 Most likely caused by a rostering mismatch between Google Classroom and McGraw Hill.

1. Ensure your class(es) are [paired correctly](#). If your class(es) are not paired correctly, then the rosters will not match.
2. Ensure the student is properly enrolled in the class within McGraw Hill. New students may take several days after enrollment to sync into McGraw Hill.
3. Ensure you are not using "Student View" in Google Classroom. This view will not work and is not indicative of the experience students will have.

"CI2" Error Message

Most of the time this is caused when launching an assignment too quickly after creation.

1. Ensure you and students are waiting 2-3 minutes after assignment creation to launch it.
2. Ensure the assignment "start date" has passed. Assignments with future start dates cannot be launched by students.

"L500" Error Message

Often indicative of a greater issue with the district's installation of the app. The issue may exist on either the district side or the McGraw Hill side.

Reach out to your District Administrator contact support for this error.

Assignments and Grades Not Syncing Properly

Most of the time this is caused by incorrect [class pairings](#).

Ensure your class(es) are paired correctly by reviewing the class pairings section. If your class(es) are not paired correctly, assignments and grades will not function as needed and may result in additional errors.

Grades Not Syncing for Some Students

If only some students within a class do not have grades populating in the Google Classroom gradebook, but other students do, this indicates some students have not launched an assignment directly from within Google Classroom this school year.

Ensure the student launches any active assignment from directly within Google Classroom. You can then [manually sync grades](#) through the McGraw Hill tool to populate all grades for this student within the Google Classroom gradebook.
