

# Bruce Maring

Instructor | Daytona State College

- Virtual Labs user since 2020
- Platforms: Connect® and D2L
- Courses taught: 2 Semester Anatomy & Physiology

## My favorite feature of Virtual Labs

It is more immersive than simple text and interactive for students.

## My advice for a new user

Embrace the Virtual Lab activities. Some are more interactive than others. The new instructor should try out all related Virtual Lab activities related to their subject and choose the ones they can best apply.

## How Virtual Labs are beneficial

A great technique to capture the students' attention and stimulate their interest.

## Top tip for using Connect for lab?

Use the adaptive pre-lab assignments. They personalize the experience for each student.

## Virtual Labs Tips

- 1** Try them out.
- 2** Require the Virtual Lab activities for course credit.
- 3** Possibly do the first couple during a lab/lecture setting to show the student how simple and interesting they can be to complete.
