

# **CPA Evolution**

Moving toward the expected 2024 CPA Exam launch, we are available to support you during any course redesign. We have aligned our content around the CPA Evolution Model Curriculum blueprint released by the AICPA and NASBA.

In other words, "We've got your back!" Here is the support you can expect from us:

#### **Model Curriculum Correlation Guides**

Our authors have correlated coverage of modules, topics, and learning objectives in our products to the new Model Curriculum blueprint. These correlation guides are located under instructor resources within our most current edition McGraw Hill Connect® courses.

#### **Data Analytics in Connect for Accounting Courses**

Since 2018, we have worked to create best-in-class data analytics content for all core course areas in Accounting. With content spanning Introductory products through Tax, Auditing, Cost and Advanced Accounting, among others, our content builds career readiness in a scaffolded manner throughout the Accounting Curriculum. We offer beginner content that introduces students to analyzing data through visualizations like Tableau Dashboards embedded directly within McGraw Hill Connect®. In upper level courses, we focus more on manipulation and analyzing big data to make business decisions within software like Excel, Tableau, and Power BI.

## **CPA Evolution continued**

#### **Two Data Analytics Full-Course Offerings**

Introductory Data Analytics for Accounting is designed to build Data Analytics skills early in the Accounting curriculum using tools like Excel and Tableau. Data Analytics for Accounting is often used in senior or master-level courses, allowing students to build their Data Analytics skills using technology and working with big data. Each of these titles includes hands-on labs to help students become career ready.

### **Digital Training**

We offer 1-1 or group training sessions and course-build recommendations with our team of digital faculty consultants—our Connect power users! You can request a colleague-to-colleague training through your local Learning Technology Representative.

### **Implementation Support**

Best-in-class implementation services to help build or rebuild your Connect courses, based on your preferred setup. Let us take this weight off your shoulders!

#### **UWorld (formerly Roger) CPA Partnership**

UWorld CPA content is integrated directly into select Connect courses. It provides the highest quality CPA Exam multiple-choice and simulation questions, helping students master critical concepts they will see on the CPA Exam. In addition to access to select UWorld questions through Connect, UWorld CPA provides a wide variety of options for you to integrate their entire suite of CPA Review resources directly into your program. This includes direct curriculum mapping to the AICPA Blueprints both now and into the future with the 2024 Evolution. To learn more, visit accounting.uworld.com/cpa-review/partner/university

Our editorial and author teams continue to review edits and updates to the CPE Evolution and Model Curriculum blueprints to ensure our newest editions are closely aligned with new standards. Please reach out with questions as you transition so that we can help and support you! We've got your back!
