

Electrocardiography for Healthcare Professionals, 5e

Kathryn Booth and Thomas O'Brien

©2019

ISBN: 1260203840

Detailed List of New Features

- Many revised figures, as well as new figures, tracings, and tables for improved clarity and up-to-date information that also provides additional student practice.
- Consolidated information on standard and isolation precautions.
- Expanded and reorganized information about pacemakers and bundle branch block in two separate chapters.
- Added and updated content about the following topics: sinus exit block, tilt test, telemetry (including mobile cardiac outpatient telemetry [MCOT]), cardiac stents, and left ventricular assist devices (LVAD).
- Added several competency checklists for student practice, including checklists for measuring pulse and respiration, measuring adult blood pressure, pacemaker evaluation, and immediate care for cardiac patients.
