available in

connect®

Available for the first time in Mc-Graw Hill's Connect! *Principles of Statistics for Engineers and Scientists* emphasizes statistical methods and how they can be applied to problems in science and engineering. The book contains many examples that feature real, contemporary data sets, both to motivate students and to show connections to industry and scientific research. Because statistical analyses are done on computers, the book contains exercises and examples that involve interpreting, as well as generating, computer output. This book may be used effectively with any software package.

It All Starts with You >>>

McGraw-Hill Connect® is a course management and adaptive learning solution that enhances your unique voice and teaching style. As your partner, we're committed to helping you achieve your course goals and unlock student potential. That's why we've made meaningful updates to this edition.

New In Connect:

New edition has Connect for the first time with over 250 end-of-chapter problems! – Connect allows the professor to assign homework, quizzes, and tests easily and automatically grades and records the scores of the student's work. Many problems are algorithmically generated and can be randomized to prevent sharing of answers. Problems might also have a “multi-step solution” which helps move the students' learning along if they experience difficulty.

SmartBook® 2.0 – Our adaptive reading experience has been made more personal, accessible, productive, and mobile.

Writing Assignments – This assignment type delivers a learning experience that helps students improve their written communication skills and conceptual understanding. As an instructor, you can assign, monitor, grade, and provide feedback on writing more efficiently.
