Alicia Ney

Connect Student

Northeast Iowa Community College

The result in my grade improvement was...

“great! I started the semester working diligently through Connect and Learnsmart® and that carried me through the course. I was able to use Learnsmart to determine concepts I didn’t quite understand so that I could later ask questions in class. And Connect highlighted key concepts of each chapter.”

I used Connect because...

“it was helpful in reinforcing course concepts and objectives. Connect was even a fun and challenging way to learn. The matching, categories, and images were also helpful for piecing together anatomy and physiology.”

I would recommend Connect to students who...

“are taking courses that rely heavily on scientific or mathematics concepts. Connect puts concepts into perspective. Biology, anatomy, chemistry, algebra, etc. are all examples of classes that students would benefit from a Connect assignment program.”

Connect helped me by...

“reinforcing the material I learned in class and in the textbook.”

The thing I liked most was...

“that the questions pertained directly with course objectives. The Connect assignments were focused on the concepts that we needed to know and understand for further chapters.”

I found the experience...

“fun. Surprisingly, I enjoyed working on anatomy and physiology assignments because I felt I would actually learn something. I never dreaded the assignments or reading.”

Connect made me happy because...

“I felt that I was understanding and grasping the material long-term!”
