Student

Northeast Iowa Community College

The thing I liked most about Connect was...

"The thing I liked most was that after something was taught and learned, Connect would not keep going over it over and over again; it would move on and focus on the things that needed work. I also love how hip and modern it was--instead of lugging around my heavy textbook I was able to study right off of my computer. Connect was easy to use and I loved how once you submitted your assignment it was automatically graded."

Connect helped me by...

"Connect helped me by proving to me that studying for hard classes can actually be very fun! Connect moved at a pace that was set for me by me, and would redirect me towards images and paragraphs that would help with my studying."

Connect made me happy because...

"Connect made me happy because, like every student who has a hectic schedule, it was time set aside that helped me study and prepare for all things--quizzes, tests, homework, etc.--in a fun and easy-to-use way, focusing on things that I needed to work on to improve my grade. I especially enjoyed how Connect would show you the correct answers to the questions you got wrong, and redirect you to the area in the book that could help explain the answer."
