Beth Ann Kersten

Professor

State College of Florida

Connect made me happy because...

“I was able to create more effective and enjoyable learning activities for my students in a fraction of the time it used to take.”

My experience using Connect was...

“better than I expected for both my students and myself. Students commented frequently about how helpful the LearnSmart® assignments were at guiding them through the reading and improving their understanding. One student even said that LearnSmart made reading the text book less intimidating, which helped to put her more at ease.”

Connect helped me improve my course by...

“helping me to identify students who were at risk through just the first few LearnSmart® assignments of the semester. Additionally, I created a cadaver learning experience that complimented our existing model based lab activities. The pairing of cadaver images with hands on model use greatly improved student outcomes on lab exams.”

I chose Connect because...

“I believed it would help me provide my students with a more interactive learning experience and improve overall student success in my course. I also knew Connect® had a more instructor friendly interface, which would decrease the amount of time needed to create assignments.”
