

Anatomy & Physiology

#MHEhAPpiness

Brad Fillmore

Senior Lecturer – Physiology

Eastern Washington University

Connect made me happy because...

my students come to class more prepared, more engaged. It allows me to do more, and offer more than I have resources to do. It helps provide their light bulb moment any time of the day.

Connect helped me improve my course by...

allowing me to customize the vast content into a logical, easy to follow sequence. It allowed me to provide numerous resources for my students. It allows me to permit them to access and be successful with the study tools at their convenience—24/7—365! My life is much easier now and my students are more successful than ever.

My experience using Connect was...

most intuitive, easy course construction that I have ever been through. I was able to completely customize my course exactly the way I wanted it. This powerful tool set makes my life much easier. I can't be without it!
