Professor

Grand Valley State University

### Connect made me happy because...

“it is a super product, its so good for my students, its good for me. I have more time, I have more energy, my students are more engaged. Connect® is just the best tool out there for getting students involved. There are no glitches, its SUPER!”

### My experience using Connect was...

“amazing! I love using the product, it has made me a better teacher and my students LOVE it!”

### Connect helped me improve my course by...

“giving me the power to manage homework with large classes. My students now have the ability to practice and learn their own weak points within the material in a very engaging way. This was not possible before and no other platform is as easy to use.”

### I chose Connect because...

“of the ease and simplicity for the student and the faculty. Connect® is intuitive an easy to navigate. Time is not wasted on learning how to use the application. Instead, time is used wisely to introduce or reinforce anatomy and physiology content.”
