**The result in my grade  
improvement was...**

“about 10%.”

**I would  
recommend  
Connect to  
students who...**

“have a lot of information they need  
to learn that is technical.”

**I found the  
experience...**

“sometimes difficult and  
challenging, sometimes  
easy.”

**Connect helped  
me by...**

“taking me through the paces.”

**The thing I liked most was...**

“it was quite habit forming and interactive. It helped break the material down to small bites of information and makes that information more comprehensible. Also, Connect kept track of where I was not fully understanding the material and kept bringing me back to it in a different way until I could grasp the concept.”

**Connect made me  
happy because...**

“it walked me through the material.”
