Connect Student

Northern Virginia Community College

Connect helped me by...

“providing me with helpful videos that increased my understanding of physiological concepts”

I would recommend Connect to students who...

“have trouble being able to study on their own. Connect can be useful as a guide.”

The thing I liked most was...

“that there was no grade penalty if I answered a question incorrectly.”

The result in my grade improvement was...

“the instructor allowed me multiple times to answer the question without a grade penalty.”

Connect made me happy because...

“I was satisfied with the homework grades and its ability to explain material through videos.”
