Eric Neuman
Connect Student
Clemson University

Connect made me happy because...

“it allowed me to organize my studying and make the most of my time spent using the textbook. I found that I was able to find information quicker and easier than I would be able to with a physical textbook.”

I used Connect because...

“I needed access to a textbook for my lab and I was interested in trying the online format.”

I would recommend Connect to students who...

“enjoy using electronic text and would like a highly structured textbook experience.”

Connect helped me by...

“organizing information into accessible sections and making it very easy to find particular sections and keywords.”

I found the experience...

“satisfying and accessible.”

The thing I liked most was...

“the bookmark function which allows me to highlight and easily locate important sections of the text.”
