Fredy Ruiz

Instructor

Miami Dade College

I chose Connect because...

“it provides a modern way to review scientific concepts in a comprehensive, concise, and detailed form.”

Connect made me happy because...

“it is a very complete packet that promotes students to spend time learning from different types of tools, and facilitates teaching and participation of students!”

**Connect helped
me improve
my course by...**

“supporting the explanations of key concepts. Promoting critical thinking based on clinical applications. Summarizing definitions on medical terminology.”

My experience using Connect was...

“a very positive experience of having different tools not only to be used during class time, but also for home work and grading purposes! Connect is still valid tool for Nursing and Health Professions, during the Physician Assistant Program I used to review clinical definitions related with pathophysiology of different conditions, and the integration was fast and easy!”
