University of Georgia

Introductory Spanish, Intermediate Spanish

My favorite thing about Connect is...

“The plethora of activities to choose from. The grade book and student extension feature is super easy to use. E-book for in-class viewing.”

Connect helped me improve my course by...

“Being an excellent supplement to the textbook and to my course.”

My top 3 tips for using Connect:

- “Assign LearnSmart activities before you present a new concept in class! It's an adaptive learning tool that registers what students have already mastered and what they need extra practice with. When you go to assign the activity be sure to adjust the desired amount of time they should work on this activity.!”
- “Assign closed grammatical activities on Connect so class time can be a communicative environment.”
- “The student reports are great so you can keep track of where students stand in the course.”

My best advice for a new user:

“Don't get overwhelmed by the amount of content! Start small and over semesters, explore different activities based upon your teaching goals. Take advantage of the McGraw Hill support team.”

What Connect could mean for you:

“Textbooks and online platforms can be expensive for students but this online platform is worth the price. Connect is constantly changing, new editions, so many activities and opportunities for students to better their language learning experience.”
