Tidewater Community College

Introductory and Intermediate French

My favorite thing about Connect is...

“The “Time Spent” Report helps me identify students with learning disabilities and the “At Risk” report prompts me to send an email to students who are falling behind.”

Connect helped me improve my course by...

“Greatly developing the listening and writing skills of my students by the time they reached the intermediate levels.”

My top 3 tips for using Connect:

- “Give it a significant percentage of the final grade so students take it seriously and do the work.”
- “Be flexible with your due dates and give one extension per semester to students in need.”
- “Review your assignments in order to add or take away certain questions.”

My best advice for a new user:

“Start with a small assignment bank that you can later grow; ask for help from McGraw-Hill experts.”

What Connect could mean for you:

“Assigning automatically graded Connect homework freed me to devote more time correcting essays and rewrites, and more time on oral proficiency testing.”
