Connect Student

Palm Beach State College

The thing I liked most was...

“that I am able to attempt the assignments multiple times and also create self-quizzes and tests to determine how well I know the material.”

I used Connect because...

“my professor believes it will enhance my learning on his subject.”

Connect helped me by...

“having the material available through the web without having to carry the text book around and read it.”

The result in my grade improvement was...

“increased!”

Connect made me happy because...

“it is structured with many different ways to learn the material rather than just writing everything on paper and reading the material from the text book.”

I found the experience...

“to be great!”
