Katrina Graves

Connect Student

Southwestern Illinois College

The result in my grade improvement was...

“noticeable. I feel that my grade would have been significantly lower if I had not used Connect.”

I would recommend Connect to students who...

“like to review material outside of class.”

I found the experience...

“overwhelming at first because it seemed like a lot of work, but when you learn your way around Connect it is very useful.”

The thing I liked most was...

“that you could review the homework questions after submitting them and that it highlighted the most important material when reading. I also liked how the reading questions adapt to your understanding of the text.”

Connect helped me by...

“providing several ways to study and go over new material.”

Connect made me happy because...

“it helped me better understand the material that we were covering in class and was a very helpful tool in a class I found challenging.”
