Connect made me happy because...

“it was easy for me to learn how to create assignments and such. It also grades the assignments for me and imports them directly to my Blackboard grade book.”

My experience using Connect was...

“it has been very successful with my face-to-face as well as my online classes. I feel it has increased my students’ participation and engagement with the subject matter.”

I chose Connect because...

“I wanted my students to gain technological confidence and knowledge by working with the Connect and LearnSmart® assignments as well as actually read the book (via SmartBook). This has created an atmosphere of increased engagement in and out of the classroom.”

Connect helped me improve my course by...

“the students have gained confidence with their repeated practices on various assignments. They are also more prepared for classroom discussions.”
