Melanie Lopez

Connect Student
Miami Dade college

The result in my grade improvement was...

"substancial. The only thing boosting my grades is my proactiveness with the material."

Connect helped me by...

"sifting through the material with a fine tooth comb making sure I understood everything that was vital to learning key objectives in a way that would stick with me."

I would recommend Connect to students who...

"struggle understanding or retaining material"

I used Connect because...

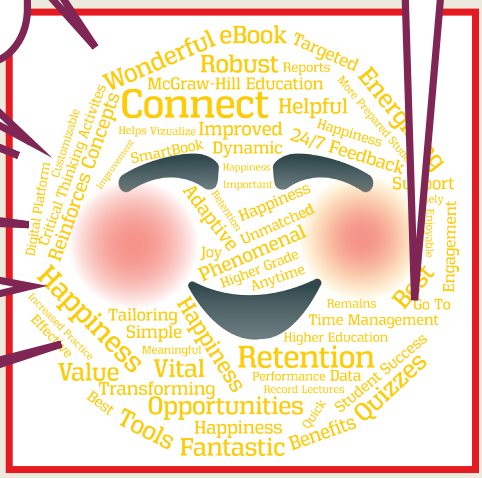
"I need it for homework."

The thing I liked most was...

"when the questions were worded differently but the topic was the same."

I found the experience...

"enlightening."

Connect made me happy because...


"I can apply what I learn to real life."
