First Year Experience

McLennan Community College

Connect made me happy because...

“I am able to see both individual student progress as well as progress for my entire class. I also like the pre-built PowerPoint presentations and test bank questions that are provided, but I have the autonomy to make the changes I want in order to better suit my classes and my students.”

Connect helped me improve my course by...

“being able to see student progress and areas of struggle so that I can identify and help each student.”

My experience using Connect was...

“great. Students can see for themselves in their reports where they are struggling and then are provided strategies to remediate. Grades in my classes have increased significantly since using Connect.”
