

### Anatomy & Physiology

# #MHEhAPpiness

## Millicent Heeney-Stemple

Associate Professor

Bucks County Community College

### Connect made me happy because...

“it freed my time from grading physical papers and provided me the opportunity to have more one-on-one time with students.”

### My experience using Connect was...

“fantastic! The courses were set up and easily maintained from semester to semester. The courses were easily modified to support the different students and learning styles, as well as upcoming new developments in the ever-changing science world.”

### I chose Connect because...

“it allows the student a stepped approach to learning and mastering the wealth and complexity of the material. The product allows me to provide the students with a more guided approach to facilitate their individual learning tempo and depth of the concepts.”

### Connect helped me improve my course by...

“providing clearer visual aides and support materials. These clearer visual aides were then assessed in quizzes and exams in very clear prompts for the students to maximize their learning and mastery.”
