Molly Schiel

Science Instructor

Northeast Iowa Community College

My experience using Connect was...

"Dynamic. Connect has been a part of my teaching and my students' learning for more than 6 years. During that time, I've never just "rolled over" a course; feedback and tweaking to meet the needs of my learners happens each year."

Connect made me happy because...

"I can put my energies into my students and not into prepping and building assignments. Filters are my friends!"

Connect helped me improve my course by...

"giving my students opportunities and feedback 24/7, something I couldn't physically provide if using "traditional" pen and paper assessments."

I chose Connect because...

"...the increased practice, engagement, and opportunities that help my students to learn anatomy and physiology."
