## Neelima Bhavsar

Professor, Biology Department  
Saint Louis Community College

### My experience using Connect was...

“At two levels:

- 1) in class: less time spent on answering Bloom’s level 1 & 2 questions; more time for in-class activities, which involve critical thinking and group work.
- 2) out of class - less time on grading, more time for searching activities.”

### I chose Connect because...

“It made sense to utilize ‘more’ time for the benefit of students.”

### Connect helped me improve my course by...

“engaging students and actually getting them involved with the material.”

### Connect made me happy because...

“connect and LearnSmart made my students happy! Engagement makes students eager -> curious students makes class lively -> lively interactions lead to knowledge and application -> which makes everyone Happy.”
