Stephen Sullivan

Professor

Bucks County Community College

My experience using Connect was...

"I found Connect relatively simple to use and it has almost everything I need. I can give auto-graded exams with question styles that are not possible with a typical LMS. The data I get from SmartBook and Connect tell me everything about what each student needs."

Connect made me happy because...

"Connect allows me to focus my time in class on the learning objectives my students are struggling with, rather than wasting time covering LO's they are already getting. I can give my students practice assignments, remediate them, and they do better on exams. My class time is more efficient, my students are learning, and their exam grades reflect it."

Connect helped me improve my course by...

"I use a lot of digital technology in my classes. I teach traditional, hybrid, and online. I needed a comprehensive, robust, easy-to-use digital platform for assignments and exams."

I chose Connect because...

"Smartbook helps me make sure the students are doing the reading. With Connect, I can give them complex, critical thinking homework assignments so they can practice doing the higher-level problem solving that I expect them to do on exams. Using the data I get from their assignments, I can see where they struggle and that helps me teach them better."
