**Cassandra Smith**

Connect Student

University of Pittsburgh

### I use Connect because...

"I had homework due on it weekly and used it to read the required text reading in SmartBook."

### Connect helped me by...

"giving me examples of what I may encounter on tests through the homework problems and SmartBook modules."

### The result in my grade improvement was...

"I found that once I started to complete the SmartBook/LearnSmart modules I started getting higher scores on my tests"

### The thing I liked most was...

"how much easier it made studying for me. There were plenty of study and review questions readily available for every chapter. This saved me a ton of time as it helped me to pinpoint what I knew well and what I needed to study more."

### I found the experience...

"to be helpful for future classes because I really felt like I learned the material. The system was also easy to use."

### Connect made me happy because...

"it helped me to earn a better grade. It also helped me to learn better studying techniques that I can apply in my future classes."

### I would recommend Connect to students who...

"need extra practice and who don't have a lot of time to make things like their own flashcards. Also to anyone who has trouble knowing what to focus on during study time. Connect shows you what you need to study most."
