Connect Student

Texas State University

The thing I liked most was...

“the fact that there is a direct link to the place in the textbook where you can find the answer to your problem.”

I would recommend Connect to students who...

“want to see a significant improvement in your grades and life.”

The result in my grade improvement was...

“significant because it allows you to make mistakes as long as you make up for them.”

Connect helped me by...

“it helped me grasp a better understanding of the material.”

Connect made me happy because...

“it made understanding marketing a breeze!”

I use Connect because...

“my professor made it a requirement for my marketing class.”

I found the experience...

“extremely satisfying!!!”
