Olivia Alejandrez

Connect Student
Texas State University

The thing I liked most was...

"when doing your LearnSmart® assignments, you basically can't make anything less than 100% unless you simply just don't give yourself enough time, or just don't do the assignment."

I use Connect because...

"it was the access to my hybrid class assignments and exams."

The result in my grade improvement

was...

"that my grades are generally much better, because of the set up of Connect!"

Connect helped me by...

"making sure I was doing my chapter readings, and question my knowledge over the material in a unique way."

I found the experience...

"really and truly helped me with learning the material."

I would recommend Connect to students who...

"don't really "know how" to study, or have a difficult time staying on track."

Connect made me happy because...

"of the way the system is set up, it makes it all the more easier for me to make better grades. Good grades= happy student!"
