Connect Student

University of Pittsburgh

The result in my grade improvement was...

"I went from receiving a B- on my first exam to receiving an A- and an A on the second exam and the final."

Connect helped me by...

"creating new and beneficial ways for me to study material, and also helped me retain more of the material I learned in the long term."

I would recommend Connect to students who...

"don't know how to study well on their own, need to see what areas of material they're struggling with, or just want to have a program take some of the unnecessary work/preparation out of studying"

Connect made me happy because...

"it quickly showed me where I needed to improve in the coursework, and I got to see that the work I was doing though Connect ultimately helped me get the grade I wanted in the class."

The thing I liked most was...

"being able to have Connect highlight the important parts of the reading and format questions for me to answer after every few sections."

I use Connect because...

"it's a quick and easy way for me to have the resources I need to study for my classes in one place."

I found the experience...

"to be a great way for me to learn consistent study habits"
