Valerie Dominguez

Connect Student
Miami Dade College

The result in my grade improvement was...

“Huge! Every piece of information from that anatomy course still remains with me today. Connect made it very easy to remain on top of my grade in the course and allow me to find an alternative method to studying.”

I found the experience...

“Enjoyable, I truly wish all my other courses used the same program in the courses.”

Connect helped me by...

“Made studying much easier and interactive for me. I always looked forward to studying with Connect.”

Connect made me happy because...

“The tools provided were enough to boost my knowledge on the material, it made it fun to study and allowed me to get a concrete foundation while enjoying it.”

I would recommend Connect to students who need...

“struggle in visualizing concepts, enjoy using a user friendly interactive system. For those especially that are a part of the course with difficult materials and concepts to understand. Connect does a fantastic way of simplifying even that of a difficult concept.”
